**AGRICULTURAL SERVICES BOARD MEETING MINUTES**

Thursday, November 21, 2024  
9:00 A.M.

Committee Room  
262075 Rocky View Point  
Rocky View County, AB T4A 0X2

---

Present: Councillor G. Boehlke, Chair  
Member A. Bates, Vice-Chair  
Deputy Reeve D. Kochan  
Councillor S. Wright  
Member T. Birchall  
Member T. Ecklund  
Member T. Fehr

Also Present: K. Lines, Manager, Agriculture and Environmental Services  
L. Poile, Agricultural Services Officer, Agriculture and Environmental Services  
M. Austen, A/Supervisor Waste and Recycling, Utility Services  
C. Yee, Solid Waste and Recycling Advisor, Utility Services  
E. Wintle, Waste and Recycling Assistant, Utility Services  
K. Wrzosek, Legislative Officer, Legislative Services  
M. Mitton, Legislative Officer, Legislative Services

---

**A Call Meeting to Order**

The Chair called the meeting to order at 9:02 a.m.

**B Updates/Approval of Agenda**

MOVED by Member Fehr that the November 21, 2024 Agricultural Services Board meeting agenda be approved as presented.

Carried

**C-1 April 25, 2024 Agricultural Services Board Meeting Minutes**

MOVED by Member Birchall that the September 19, 2024 Agricultural Services Board meeting minutes be approved as presented.

Carried

## E-1 Agricultural Fieldman Report

Kristyn Lines, Manager Agricultural & Environmental Services reported the following:

1. Agricultural Service Boards (ASB's) are unique to North America. They are special committees appointed by the local municipal council to address agricultural concerns in their communities. ASBs play a critical role in assessing the needs and direction of the agriculture industry in the County, as well as identifying obstacles and working to resolve any problems that may arise. Alberta Agriculture and Irrigation has created a Fact Sheet and Infographic for Agricultural Service Board Members, and it is attached in this report along with the ASB Orientation Manual.
2. One resolution was discussed and voted on at the Central Region ASB Conference on October 17, 2024. The resolutions passed and is attached for review.
  - a. 1-24 Rural Veterinary Student Support
3. John Conrad's - ADM Primary Agriculture ASB Town Hall meeting was held virtually on November 14th, 2024.
4. The 2025-2029 ASB Grant Program is open and accepting applications until January 31st, 2025. Administration is working on completing an application for the Legislative Funding Stream & the Resource Management Funding Stream.
5. The Provincial Agricultural Service Board Conference is an annual conference held in January. The conference allows ASBs from across the province to learn about new agricultural issues and discuss resolutions to improve the agricultural industry within Alberta. The 2025 ASB Conference is scheduled for January 20th – 23rd in Edmonton and the agenda will be sent out, along with registration details as soon as it becomes available.

MOVED by Member Bates that the Agricultural Fieldman report be received for information.

Carried

MOVED by Member Ecklund that the Agricultural Service Board prepare and submit a letter of response to the Senate of Canada regarding proposed changes to Bill C-293, the Pandemic Prevention and Preparedness Act.

Carried

## D-1 Waste and Recycling – 2024 Ag Recycling Roundups

Presenters: Erin Wintle, Waste and Recycling Assistant, Utility Services  
Mason Austen, A/Supervisor Waste and Recycling, Utility Services  
Christian Yee, Solid Waste and Recycling Advisor, Utility Services

1. Empty pesticide containers were not collected at this year's events and are no longer accepted at County Transfer Sites as the national collection program of these materials is transitioning to retailer (point of purchase) collection.
2. The Springhill Chuck Wagon site expanded to a Transfer Site in Q3 2024, which not only creates a year-round collection site in the NW portion of the County, but it also allows for year-round collection in all four quadrants of the County.
3. With these changes, future years may see the number of Ag Roundup events decreased.

MOVED by Deputy Reeve Kochan that the 2024 Ag Recycling Roundups report be received for information.

Carried

## E-2 Alberta Agricultural and Irrigation Report

Laura Poile, Agricultural Services Officer reported the following, on behalf of Kellie Jackson, Program Assurance Specialist, Alberta Agriculture and Irrigation:

1. **Weed Engagement:** The Weed Review Committee which consists of representatives from AGI, Regional AAAF membership, stakeholders from urban municipalities, industry and agriculture NGO's will begin the review of survey data in November. Regular updates will be provided to the AAAF and ASB's as the committee drafts recommendations for decision by the Minister.
2. **Weeds on Well sites:** Meetings with all parties are continuing with RMA launching a project to collect data from municipalities on this issue. AGI continues to work closely with MA on the MGA/WCA alignment and with AER to give field inspectors jurisdiction on private land.
3. **Launch of the 2025-2029 ASB Grant Cycle:** The 2025-2029 ASB grant program launches the week of November 4th with the deadline to submit completed applications by January 31st, 2025 through the ASB.Grant@gov.ab.ca email.
4. **Regional meetings:** All regional meetings were completed in October with 14 resolutions getting approved to go to the Provincial Conference in January 2025.
5. **STOPPED** – Dutch Elm Disease is regulated under the *Agricultural Pests Act* and the federal *Plant Protection Act*
  - On August 14, 2024, two American Elm tree samples from the City of Edmonton tested positive for Dutch Elm Disease (DED) through AGI's Alberta Plant Health Lab (APHL).
  - CFIA took the lead on this investigation and response. CFIA and AGI's Chief Plant Health Officer will continue to work collaboratively to address DED incidents.
  - The City of Edmonton has a DED plan in place to deal with contaminated trees and will remove/dispose of the trees immediately.
  - AGI's APHL will continue to conduct DED testing on Elm samples provided, including increased samples from the City of Edmonton if required.
  - AGI will continue to collaborate with both the City of Edmonton and CFIA as they work to remove the infected trees.
  - More trees have been tested positive for DED by the APHL after the August 14th conformation.
  - The CFIA/the City of Edmonton will make announcements on CFIA's confirmations (timing undetermined).
  - There is a ban in place on pruning elms each year between April 1 and September 30. Beetles are active during this time and are attracted to the scent of fresh tree cuts, possibly infecting a healthy tree.

MOVED by Councillor Wright that the Alberta Agricultural and Irrigation Report be received for information

Carried

**E-3 Agricultural Service Board Terms of Reference**

MOVED by Member Ecklund that the Agricultural Service Board recommend to Council that the Agricultural Service Board Terms of Reference be approved, as amended in Attachment 'A'.

Carried

The Chair called for a recess at 10:32 a.m. and called the meeting back to order at 10:40 a.m.

**E-4 Upcoming Events Report**

Laura Poile, Agricultural Services Officer, Agricultural & Environmental Services reported the following upcoming events:

1. Land Stewardship Model Channeling Investments for Regenerative Agriculture Advancements virtual event on [November 26](#)
2. Alberta Grains AGM, Banff, AB [November 27](#)
3. Prairie Cereals Summit, Banff, AB [November 27-29](#)
4. Data Literacy for Cow-Calf Producers, Red Deer [November 28](#)
5. Securing Success: Producer Opportunities Foothills Forage & Grazing Association, Claresholm [November 28](#)
6. Western Canadian Conference on Soil Health and Grazing, Edmonton [December 10-12](#)
7. Agronomy Update, online January 14 & 15, 2025 click for [Information and registration](#).
8. Provincial ASB Conference, Edmonton, AB January 20<sup>th</sup> to 23<sup>rd</sup>, 2025
9. CleanFarms The Great Twine Round-Up <https://cleanfarms.ca/great-twine-round-up/>
10. Agricultural & Environmental Services workshop list.

MOVED by Member Ecklund that the Upcoming Events Report be received as information.

Carried

**E-5 Appointment of ALUS Committee**

MOVED by Deputy Reeve Kochan that the entirety of the Agricultural Service Board be appointed to the ALUS Committee

Carried

## G Farm Member Reports

Travis Ecklund

- The shortage of rural vets is an issue
- Development pressure in their area, received a letter from someone the other day about putting a battery storage facility (solar) by them, they were canvassing the area for responses
- There is increasing dust from the traffic going to and from Cochrane, it is turning the leaves grey
- Alta Link is going through with their project that is in the area, they have been good to deal with
- Cochrane developers are going after agriculture land because its them against one person rather than an area that is full of acreages; this exacerbates the problem of agricultural lands being taken out of production for development
- Great fall, the cow's still have a lot of grass in the pastures and there are plans on grazing them until January
- There was good moisture this past year in the area

Angie Bates:

- Looking for lots of snow, there is a need for moisture in the area
- The area does not have the same development pressure, but acreages are an issue in the area, they have livestock they don't think they have to retain
- Gopher populations are increasing, entire canola fields have been taken out
- Wells are drying out in the area, filters are covered in silt and have to be changed out more often, continually fighting the pressure of more acreages and the lack of water
- Operational challenges of increased development (acreages) has on farming ie lack of water

Tricia Fehr:

- Happy for some snow, the moisture is needed
- Busy fall, the warmer weather and lack of ground freeze allowed a lot of stuff to be done
- Record calf prices this fall, but buyers are getting nervous after the election south of the border
- Sitting on a water policy panel at the University of Calgary, will help bring concerns forward if anyone has any
- Grain prices are very low

ROCKY VIEW  
COUNTY

Trevor Birchall:

- Everyone was able to replenish feed supply, cattle have been out grazing and can continue to do so provided there is not a ton of snow
- Record calf prices people are happy about that and red meat prices are higher as well
- This years hunting season hasn't been bad for trespassers or conflict
- Wells in the area have dropped, the number of new wells going in is definitely decreasing the water supply

**H Next Meeting**

The next meeting of the Agricultural Service Board meeting is scheduled for January 16, 2025.

**I Adjourn the Meeting**

MOVED by Member Birchall that the November 21, 2024 Agricultural Services Board meeting be adjourned 11:07 a.m.

Carried

\_\_\_\_\_

\_\_\_\_\_  
Chief Administrative Officer or designate

|             |   |
|-------------|---|
| Subject:    | Foothills Forage & Grazing Association – 9:30 a.m.            |
| Date:       | January 16, 2025  |
| Presenter:  | Kristyn Lines, Manager, Agricultural & Environmental Services |
| Department: | Agricultural & Environmental Services                         |

**REPORT SUMMARY**

Laura Gibney, manager of the Foothills Forage & Grazing Association (FFGA) will provide an overview of FFGA’s 2024 programs, upcoming 2025 programs and a continued partnership with Rocky View County.

**ADMINISTRATION’S RECOMMENDATION**

Administration recommends that the Rocky View County Agriculture Sector profile report be received for information.

**BACKGROUND**

The Foothills Forage & Grazing Association is a producer driven group that has been a leader in delivering pertinent forage and livestock information to southern Alberta producers for 50 years. The organization brings producers together by offering practical, profitable, and regenerative strategies to land managers by hosting demonstration projects, events, workshops, field tours, webinars, and networking opportunities as well as information through monthly newsletter and social media.

**DISCUSSION**

FFGA is continually developing their program to address the current needs of producer members and to cover a diverse range of topics while maintaining a high level of producer engagement. County partners provide valuable insight into topics and areas of interest within their region.

**ALTERNATE DIRECTION**

Administration has no alternate direction for the Board’s consideration.

**ATTACHMENTS**

There are no attachments.

## Agricultural Service Board

---

|             |   |
|-------------|---|
| Subject:    | Crop Market Outlook   |
| Date:       | January 16, 2025  |
| Presenter:  | Kristyn Lines, Manager, Agricultural & Environmental Services |
| Department: | Agricultural & Environmental Services                         |

### REPORT SUMMARY

---

This report provides an update on the crop market outlook for 2025.

### ADMINISTRATION'S RECOMMENDATION

---

Administration recommends that the Crop Market Outlook Report be received for information.

### BACKGROUND

---

Crop markets are influenced by a wide range of factors including an increasing level of uncertainty globally, driven by ongoing conflicts, political shifts, and the potential renegotiation of trade agreements. Additionally, U.S. ethanol and biofuel policies, along with fluctuations in currencies, further contribute to this instability. Furthermore, weather conditions continue to play a significant role in shaping market trends.

### DISCUSSION

---

Neil Blue works within the Trade, Economics and Data Analytics Branch of Alberta Agriculture and Irrigation as the Provincial Crop Market Analyst. He will provide a presentation on Crop Market Updates with an overview of the market situation for major Alberta field crops and impact considerations of potential changes in U.S. policies.

### ALTERNATE DIRECTION

---

Administration has no alternate direction for the Board's consideration.

### ATTACHMENTS

---

There are no attachments.

Agricultural Service Board

|             |   |
|-------------|---|
| Subject:    | Agricultural Fieldman Report                                  |
| Date:       | January 16, 2025  |
| Presenter:  | Kristyn Lines, Manager, Agricultural & Environmental Services |
| Department: | Agricultural & Environmental Services                         |

REPORT SUMMARY

This report provides updates on Agricultural & Environmental Services matters since the last update provided on November 21, 2024.

ADMINISTRATION’S RECOMMENDATION

Administration recommends that the Agricultural Fieldman report be received for information.

BACKGROUND

Program highlights within Agricultural & Environmental Services since the last meeting.

DISCUSSION

1. The Provincial Agricultural Service Board (ASB) Conference is being held at the Delta Hotel Edmonton South Conference Centre in Edmonton, AB from January 20<sup>th</sup> – 22<sup>nd</sup>. The conference allows ASBs from across the Province to learn about new agricultural issues and discuss resolutions to improve the agricultural industry within Alberta. The draft agenda is attached.
2. ADM John Conrad is hosting a Chairman meeting from 2:30 pm - 4:30 pm on January 20<sup>th</sup> at the conference, agenda attached. The event will be open to ASB Chairmen and Fieldmen.
3. Rocky View County received our 2024 results from the Alberta Insect Pest Monitoring Network and the final report is attached for review. Sampling is completed by the Plant and Bee Health Surveillance section of Alberta Agriculture in conjunction with County Staff. Surveys were conducted to monitor cabbage seedpod weevil, bertha armyworm, pea leaf weevil, wheat midge and wheat stem sawfly.
4. Rocky View County is currently in phase 2 of public engagement on a revised [Agriculture Master Plan](#). This updated draft plan aims to identify the needs and priorities of the agricultural community, establish goals for future growth and innovation, and provide a roadmap for achieving these objectives.

The County engaged with local farmers, agri-businesses, and residents to create a draft of the Agriculture Master Plan. During phase 1 of engagement, participants shared their views on the following:

- Protecting agricultural land
- Farm succession & flexible land use
- Sharing the priorities and contributions of agriculture
- Renewable energy & environmental sustainability

## Agricultural Fieldman Report

---

- Road infrastructure
- Legislated programs

Participation in phase 2 of public engagement includes a survey (linked below) <https://engage.rockyview.ca/agriculture-master-plan> and Community Conversations.

Community Conversation Dates:

- January 17<sup>th</sup>, 2025 at the Madden Community Hall from 11:30am – 1:30 pm
- January 27<sup>th</sup>, 2025 at the Indus Rec Centre from 11:30am – 1:30 pm
- January 30<sup>th</sup>, 2025 at the Jumping Pound Community Hall from 11:30am – 1:30 pm
- January 31<sup>st</sup>, 2025 at the Irricana Hall from 11:30am – 1:30 pm

## **ALTERNATE DIRECTION**

---

Administration has no alternate direction for the Board's consideration.

## **ATTACHMENTS**

Thank you for attending the “Growing the Future Together” - 2025 Provincial ASB Conference. A special thank you to the presenters along with the trade show participants and sponsors for helping make this Conference a success.

Growing the Future Together

## 2025 Chair meeting agenda

January 21, 2025, 2:30-3:00 pm

Chaired by : Sebastien Dutrisac

Attendance: ASB Chairs and AAAF member

1. Call to order
2. Report on the top three priorities from Regionals
3. Minister outcomes from the topics discussed on November 4, 2024
4. Future changes to Resolution Grading
5. Vote on outcomes/format of next year's chair meeting
6. 3:00 Adjourn

3:00-4:00 ADM Town Hall

# INSECT SURVEY RESULTS – 2024 – ROCKY VIEW

## 2024 Summary

Thank you Rocky View for all the work you do for the monitoring program, please know that it is appreciated.

Cabbage seedpod weevil was present in Rocky View in the survey we conducted at early flower, but a levels below threshold.

There were 4 bertha armyworm sites in Rocky View County this year. All locations never even broke the 100 moth count. Trapping will continue to be very important to watch for any possible future outbreaks. The traps across Alberta and Saskatchewan suggest that we are in the clear again in 2025 for bertha problems.

In the four fields sampled for wheat midge in 2024, I didn't find any wheat midge. That doesn't mean midge wont be an issue in 2025. Should the growing conditions favor midge development, rain in May and June in 2025 and late seeding, it will be important to scout for the insect while the wheat is in flower. We know that midge can spend several years in the soil, waiting for ideal conditions to finish its lifecycle.

Pea leaf weevil damage was low in the survey we conducted in late May – early June. We sampled 3 fields for pea leaf weevil in 2024, which is better than 2023, but will target 4 or 5 in the county in 2025.

We did find some fields with wheat stem sawfly cutting damage again in 2024, nothing to be alarmed at. This is not unexpected as sawfly is very successful in dry and hot summers. We also had reports of hessian fly in the region in 2024 and this could be confused with sawfly if you are unfamiliar with sawfly cutting.

## BERTHA ARMYWORM (BAW)

Bertha armyworm is very cyclical. In order to catch outbreaks and help producers minimize losses it is necessary to maintain a good monitoring system using pheromone traps. The number of moths caught in the traps informs us of the risk of damaging populations with a 3 to 5 week lead time. These numbers are generated from paired pheromone traps in individual fields, except in the Peace River region where only 1 trap is used to reduce impact on native pollinators.

Bertha armyworm populations are normally kept in check by such factors as weather and natural enemies. Potential damage may be more or less severe than suggested by the moth count data depending on weather and crop conditions and localized population dynamics. Research has clearly shown that very few fields are ever affected in an area with moth catches less than 300. Even at higher moth counts field scouting is critical for pest management decisions because experience has shown that field to field and even within field variations can be very large.

| LLD            | TRAP AVERAGE |

## CABBAGE SEEDPOD WEEVIL (CSPW)

In southern Alberta, including all counties south of and touching Highway 1, the earliest flowering canola crops will be at the highest risk from cabbage seedpod weevil and should be monitored very closely.

Cabbage seedpod weevil overwinters as an adult so the risk of infestation is further indicated by the adult population of the preceding fall. Winter condition also appear to have an impact on populations with mild winter favoring build-up of populations and expansion of their range.

We track the population of other insects in these sweeps as well. These go into long term data sets that will help us research their population trends over time from individual fields.

### PEA LEAF WEEVIL (PLW)

Experience has shown us that high numbers of pea leaf weevil adults in fall will likely mean significant infestation levels in the following spring. The timing and intensity of spring damage is strongly related to the onset of warm conditions (>20°C) for more than a few days in April or May. The earlier the weevils arrive in fields the higher yield loss potential. Extended cool weather delays weevil movement into the field. Yield impact is lower if the crop advances past the 6 node stage before the weevils arrive. The numbers represented here are generated from assessing feeding damage on 10 plants in 5 locations in a field.

Sampling done by Alberta Agriculture and Irrigation, Alberta Insect Pest Monitoring Network staff

### WHEAT MIDGE (SOIL) (WM)

Wheat midge is an insect that increases in numbers in wet years. Numbers can vary drastically from field to field and we try to sample wheat adjacent to the previous years' wheat in order to pick up populations if they are present. There is no definitive way to know exactly the risk in any given field so field scouting when the wheat comes into head is critical. The numbers shown here give a general trend of midge populations. Individual fields will have a different risk.

These numbers are generated by taking soil samples from wheat fields after harvest using a standardized soil probe.

The risk level as shown on our maps is as follows:

- 0 midge will be displayed as light grey (No infestation)
- 2 or less midge will be shown as dark grey (<600/m<sup>2</sup>)
- 3 to 5 will be shown as yellow (600 to 1200/ m<sup>2</sup>)
- 6 to 8 will be shown as orange (1200 to 1800/ m<sup>2</sup>)
- 9 or more will be shown as red. (>1800/ m<sup>2</sup>)

| LEGAL LAND DESCRIPTION |    |    |    |   | TOTAL MIDGE | VIABLE | PARASITOID |
|------------------------|----|----|----|---|-------------|--------|------------|

| e                      | 6  | 28 | 27 | 4 | 0           | 0      | 0          |

Sampling done by Alberta Agriculture and Irrigation, Plant and Bee Health Surveillance Section staff

**WHEAT STEM SAWFLY (WSS)**

The percent of stems cut by sawfly gives an indication of the number of reproductive adult sawflies that will emerge in late June through early July. Winter conditions have very little impact on sawfly populations and a high proportion of wheat stems cut in the fall will produce adults. It is possible that population hot spots still exist in areas of lower risk, individual producers need to be aware of the potential risks in their own fields.

## Agricultural Service Board

---

|             |   |
|-------------|---|
| Subject:    | Provincial Agricultural Service Board Resolutions             |
| Date:       | January 16, 2025  |
| Presenter:  | Kristyn Lines, Manager, Agricultural & Environmental Services |
| Department: | Agricultural & Environmental Services                         |

### REPORT SUMMARY

---

The Provincial Agricultural Service Board (ASB) Conference is being held at the Delta Hotels Edmonton South Conference Centre Edmonton, AB beginning the evening of Monday, January 20<sup>th</sup>, 2025.

### ADMINISTRATION’S RECOMMENDATION

---

Administration recommends that the Provincial Agricultural Service Board Resolutions Report be received for information.

### BACKGROUND

---

At the annual Provincial Agricultural Service Board Conference resolutions are presented and voted on by Agricultural Service Boards. The resolutions that are passed at the conference are then sent to the appropriate Government and/or Non-Government agencies for review. After they have been reviewed, they are sent back to the Provincial ASB Committee for grading and further review by Municipal ASB’s.

### DISCUSSION

---

The 2025 Conference is being hosted by the Central Region Agricultural Service Boards and members of the Association of Agricultural Fieldmen (AAAF). The resolutions passed at each regional conference and are attached for review.

### ALTERNATE DIRECTION

---

Administration has no alternate direction for the Board’s consideration.

### ATTACHMENTS

---

Attachment A: 2025 Agricultural Service Board Resolutions

**RESOLUTION 1-25: Drought and Livestock Agri-Stability**

**WHEREAS** in the last decade, Alberta has seen four of Canada's top ten extreme and costly weather-related disasters, and federal modeling for Western Canada predicts more extreme weather;

**WHEREAS** the current federal drought monitoring system aggregates weather data, including precipitation on forested crown land. This data is not available to privately held agricultural lands in its assessment, and it was the deciding criteria for the Canada- Alberta Drought Livestock Assistance program and the 2023 Livestock Tax Deferral;

**WHEREAS** the Canadian government has forecast continued extreme weather impacts on the agricultural industry. Programs like AgriStability are in place to safeguard producers' financial resilience; and

**WHEREAS** the Office of Audit and Evaluation of Agriculture and Agri-Food Canada (AAFC) evaluated AgriStability and found that while it helps protect Canada's agriculture sector from income losses due to various risks, it is not fully effective.

**THEREFORE BE IT RESOLVED  
THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

AAFC re-evaluate the current weather mapping program and the Drought Monitoring System to include and more heavily weigh data from weather stations within agricultural lands, better acknowledging municipalities straddling the transition from agricultural white zone into forested Crown green zone, coupled with making efforts to capture in these maps the extreme weather events that are now a reality.

**FURTHER BE IT RESOLVED THAT  
THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

AAFC report back to the Agricultural Service Board Provincial Committee that the recommended improvements to AgriStability as identified and released October 22, 2022, by the Office of Audit and Evaluation of AAFC were put in place, by April of 2024:

1. Identify ways to simplify AgriStability to reduce producer administrative burden;
2. Find ways to make interim and final payments more predictable and to improve the timeliness of final payments; and
3. Develop and implement a means to increase access to AgriStability by underrepresented populations.

**SECONDED BY:** \_\_\_\_\_

**CARRIED:** \_\_\_\_\_

**DEFEATED:** \_\_\_\_\_

**STATUS:** Provincial

**DEPARTMENT:** Agriculture and Agri-Food Canada (AAFC)

### BACKGROUND INFORMATION

In 2023, the impacts of drought within Alberta were far reaching and in response to the situation, Canada and Alberta partnered on a one-time funding initiative called the Canada-Alberta Drought Livestock Assistance initiative. On October 20th, 2023, the Alberta Government announced the inclusion of 41 rural municipalities in the program, leaving a further 28-member rural municipalities out of the program. On January 25th, a further 20 rural municipalities were announced as additions to the funding. Oddly, Kananaskis, Calgary and Edmonton were included in the January 25th announcement. This left 8 rural municipalities out of the funding program. Letters were sent to the federal and provincial governments asking for explanation and the response provided was that these municipalities had received average to above average precipitation over the course of the 2023 growing season.

A review of the Canadian Drought Monitor revealed that these municipalities are comprised of large areas of forested crown lands with relatively small zones of privately held agricultural lands. Further analysis suggested that while these agricultural areas experienced significant drought impacts, when balanced against moisture in the crown lands, the municipalities appeared to receive adequate moisture. GIS mapping proved more definitive when the map of crown lands was excluded.

Precipitation patterns are highly variable between white and green zones. If entire areas are being aggregated in the Canadian Drought Monitor assessments, it is not a fair reflection of what is being experienced by producers in white zones that are adjacent to green zones. Aggregate weather data loses the nuance of seasonal variation and other contributing factors. Moisture that falls within forested crown lands does not address moisture deficits experienced in privately held agricultural lands.

The following excerpt can be found from the AFSC website:

*“AgriStability is one program in a suite of business risk management programs that governments offer to help producers manage significant risks. Other programs in the suite include AgriInvest, AgriInsurance and AgriRecovery.*

*AgriStability provides Canadian producers with an ongoing whole-farm risk management tool that offers protection against large declines that threaten the viability of their farm and are beyond their capacity to manage.*

*Under the program, allowable income includes the proceeds from agricultural commodity sales and the proceeds from production insurance. Allowable expenses include commodity purchases, along with direct input costs incurred in the farming operation.”*

The summary of the audit of the program indicated the following:

- Participation for underrepresented populations such as young farmers, women, Indigenous Peoples, and

persons with disabilities.

- AgriStability is expensive to administer due to its tailored (individualized) and complex nature.
- AgriStability provides access to individualized whole-farm protection from large income declines, and helped protect producers' incomes, for large producers, but did not always meet performance targets.

## CONCLUSION

AgriStability has the potential to provide a broader level of support for Canada's agricultural sector and support a larger number of small operations. However, current design and delivery favours larger operations and sectors with narrow margins. Program payment predictability, timelines and program complexity continue to be an issue. Tailored communications and capacity building activities with underrepresented groups could improve their participation in the program.

## RECOMMENDATIONS

The Assistant Deputy Minister, Programs Branch, in consultation with provincial administrators, should:

RECOMMENDATION 1: identify ways to simplify AgriStability to reduce producer administrative burden.

RECOMMENDATION 2: find ways to make interim and final payments more predictable and to improve the timeliness of final payments.

RECOMMENDATION 3: develop and implement a means to increase access to AgriStability by underrepresented populations.

## MANAGEMENT RESPONSE AND ACTION PLAN

Management agrees with the evaluation recommendations and has developed an action plan to address them by April 1, 2024.

RESOLUTION 2-25: Landowners’ Rights for Renewable Energy Projects

**WHEREAS** landowners surrounding renewable energy developments often face significant impacts, including changes to land value, reduced crop yields, proliferation of weeds, and potential irreversible damage to the land;

**WHEREAS** landowners are exposed to great risk as it relates to the determination and structure of compensation, recovery for unpaid rentals, off lease damages, and potential long-term impacts;

**WHEREAS** the Alberta Utilities Commission (AUC) regulates renewable energy projects, but the regulatory framework for protecting landowners in renewable energy cases is less detailed compared to the Oil and Gas Industry;

**WHEREAS** the Oil & Gas Industry has legal protections under the Surface Rights Act, including compulsory access rights, standardized compensation structures, and formal dispute resolution mechanisms via the Surface Rights Board; and

**WHEREAS** landowners facing renewable energy project proposals must negotiate directly with developers to establish their own terms, with the potential for costly legal counsel and limited government support.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Alberta Utilities Commission provide landowners with access to legal frameworks, such as the Surface Rights Act, which includes compensation guidelines, environmental protection measures, and land reclamation requirements supported by strong enforcement mechanisms.

**FURTHER BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Alberta Utilities Commission create an independent tribunal to oversee regulatory compliance and handle disputes related to Renewable Energy projects.

## BACKGROUND INFORMATION

AUC inquiry update: Alberta to declare no-build zones and mandatory reclamation security requirements for renewable energy projects.

AUC's Module A Report was released on January 31, 2024. The report is an inquiry into the ongoing economic, orderly and efficient development of electricity generation in Alberta, but does not address landowner compensation. The report only indicates that some energy proponents are offering neighborhood agreements or "community benefit funds", however there is no official requirement or regulation being implemented for energy developers to offer this.

Under the *Surface Rights Act*, landowners are entitled to several protections when it comes to oil and gas leases. For example, compensation must be reviewed every 5 years throughout the life of the oil well.<sup>1</sup> If an energy company fails to make its annual lease rental payments, a landowner has the right to apply to the Land and Property Rights Tribunal to recover those payments. Additionally, if any off-site damage occurs – such as loss or damage to livestock or personal property – or if any time is spent recovering property, landowners may apply to the Tribunal for compensation up to \$50,000.<sup>2</sup>

There are some studies that have been done regarding the impact on property values due to renewable energy projects. The bulk of the existing studies focus on wind power plants. Overall, some studies found a statistically significant and negative impact; other studies found no material impact.<sup>3</sup> Further research is needed to better quantify the impact they would have on property values in close proximity to solar panels and windmills.

### **AUC inquiry update: Alberta to declare no -build zones and mandatory reclamation security requirements for renewable energy projects, by Osler**

On February 28, 2024, Alberta Premier Danielle Smith and Minister of Affordability and Utilities Nathan Neudorf [announced](#) the intended policy, legislative and regulatory changes following the conclusion of Module A of the Alberta Utilities Commission's (AUC) inquiry into the ongoing economic, orderly and efficient development of electricity generation in the province.

We have previously reported on the AUC's inquiry regarding electricity generation in prior Updates on [August 3](#), [September 8](#), [September 13, 2023](#), and [January 30, 2024](#).

The AUC established two separate modules for its consideration of the issues identified by the Alberta government in their Order in Council: [Module A](#) and [Module B](#).

Module A considered the following factors:

1. the development of power plants on specific types or classes of agricultural or environmental land
2. the impact of power plant development on Alberta's viewsapes
3. the implementation of mandatory reclamation security requirements for power plants
4. the development of power plants on lands held by the Crown in right of Alberta

This culminated with the AUC delivering its Module A Report to the Minister of Affordability and Utilities on January 31, 2024.

---

1. Section 27 of *Surface Rights Act*

2. Section 30(2) of *Surface Rights Act*

3. “Impact of Power Plant Development on Viewscapes” Report by Nichols Applied Management Inc. for the AUC.

Module B is ongoing. In this proceeding, the AUC is considering the impact that increasing growth of renewables has on both the generation supply mix and electric system reliability. The AUC will deliver the Module B Report to the Minister of Affordability and Utilities no later than March 29, 2024.

The AUC has [continued to process applications](#) [PDF] up to the decision stage for new power plants that produce renewable electricity while the approval pause period has been in effect.

With the pause lifting as the [Generation Approvals Pause Regulation](#) expired on February 29, 2024, the Minister of Affordability and Utilities [issued a letter to the AUC](#) [PDF] to provide policy guidance regarding the issues considered in Module A along with the following policy, legislative and regulatory changes.

1. An ‘agriculture first’ approach

The Alberta government will direct the AUC to take an “agriculture first” approach to the approval of future renewable electricity generation projects with the goal of ensuring Alberta’s that native grasslands, irrigable and productive lands continue to be available for agricultural production. Enhanced standards will be introduced for project development on Class 1 and Class 2 agricultural lands, as classified by the [Alberta Land Suitability Rating System](#) (LSRS). Alberta does not have any LSRS Class 1 agricultural lands, but LSRS Class 2 agricultural lands account for approximately 25% of the land in what is known as the White Area<sup>[1]</sup> of Alberta.

If a project is proposed to be located on Class 1 or Class 2 agricultural lands, proponents must demonstrate the ability for both crops and/or livestock to coexist with the renewable generation project. Examples could include a demonstrated plan for agrivoltaics or sheep grazing alongside solar projects, or clearly demonstrating that continuing crop growth and livestock grazing is possible following the implementation of a wind project. The scope and scale of any such required agricultural integration and coexistence is currently unspecified.

The AUC will begin taking into consideration this “agriculture first” approach on March 1, 2024, and has indicated that this approach will not be applied retroactively.

2. Reclamation securities for future development

The Government of Alberta will develop and implement the necessary policy and legislative tools to ensure that developers are responsible for reclamation costs through bond or security requirements, with appropriate security amounts and timing to be determined by Environment and Protected Areas in consultation with Affordability and Utilities. Developers will be responsible for reclamation costs, which will be either paid directly to the Government of Alberta or negotiated with landowners if sufficient evidence is provided to the AUC.

In addition, the AUC will require more details in terms of reclamation commitments as part of the application process and will also be actively engaging in a process to determine the appropriate level of reclamation security on a project-by-project basis. In the government’s press conference on February 28, 2024, Premier Smith suggested that a reclamation trust structure where developers contributed amounts over time could be a sensible outcome. A gradual contribution to the reclamation security would be a better outcome for renewables developers than some alternatives, such as a requirement to post 100% of the reclamation security prior to the commencement of construction (which has associated costs).

The new requirements will apply to all AUC approvals issued on or after March 1, 2024.

3. Buffer zones surrounding protected areas and ‘pristine viewsapes’

The Government of Alberta will develop and implement the necessary policy and legislative tools to establish buffer zones, of a minimum of 35 kilometres, around protected areas or other “pristine viewsapes.” The scope of this exclusion zone is not clear, but has the potential to be extensive as there are 464 protected areas within Alberta that amount to 4,551,912.39 hectares of land.<sup>[2]</sup>

New wind projects will no longer be permitted within these exclusion zones and other proposed developments located within such buffer zones may be subject to a visual impact assessment before approval.

The AUC will also be required to perform site visits in order to determine impacts on viewsapes as part of the approval process. The province has yet to provide a definition for the term “pristine viewsapes” and has indicated that it will work alongside the Ministry of Environment and Protected Areas, Ministry of Forestry and Parks and Ministry of Tourism and Sport to identify areas that would be considered “pristine viewsapes.”

Of the announcements, this likely creates the most uncertainty and is likely to be the most challenging for wind developers. Given the significant upfront time and cost for wind project development, it is important that developers know on day one whether the options to lease or other land agreements they are entering into are or are not in an area with pristine viewsapes. It will be important that the Government of Alberta provide additional certainty over this rule sooner rather than later so that development of new wind projects can continue.

The government indicated that this policy change will not be applied retroactively to approved projects and will only impact project approvals issued on or after March 1, 2024.

4. Crown land

The Government of Alberta will develop and implement the necessary policy and legislative tools to enable the development of renewable generation on Crown lands on a case-by-case basis. Development on Crown lands will be supported by a new policy that will require meaningful engagement, including with Indigenous communities, before any policy changes are implemented. Overall this is a positive development for renewables developers, as to date there was no policy in place permitting the granting of land rights for renewable energy projects on Alberta Crown Lands, and this opens up to an additional 60% of Alberta to renewables development.<sup>[3]</sup>

This government’s intention is to have such policy and legislative changes developed and implemented by late 2025.

5. Consideration of appropriate setbacks

The Minister’s letter to the AUC states that the AUC will conduct a proceeding or other process to consider appropriate setbacks of renewable infrastructure from neighbouring residences and other important infrastructure.

No timeline is provided for this policy change.

6. Municipal participation

The AUC will automatically grant municipalities the right to participate in AUC hearings and the permitting process. This will include the opportunity for municipalities to seek participant funding to engage in the AUC processes and expanding eligibility for cost recovery to municipalities to reduce barriers for

participation in circumstances where they intend to file expert evidence or arguments that will assist the AUC.

The AUC has also committed to allowing municipalities to review rules related to municipal submission requirements while clarifying consultation requirements. No timeline is provided for this policy change.

#### 7. Upcoming Transmission Regulation changes

The Minister of Affordability and Utilities advised that future changes would occur to Alberta's *Transmission Regulation (Alta. Reg. 86/2007)* originating from the [Transmission Green Paper](#) [PDF]. These changes are expected in the coming months and renewable projects should expect changes to the allocation of transmission costs.

We summarized the [recommendations in the Green Paper](#) in our Update in late January. Whether and to what extent any such changes could allocate these costs to existing (or in-construction) renewable projects was not specified in the Minister's announcement and remains a key concern for industry.

#### Impact to projects

The Minister stated that these new policies will only be applied to renewable project approvals going forward, not retroactively to existing projects, though their application to amendments to existing approvals is unconfirmed. Nonetheless, considerable uncertainty remains for renewable energy developers in the province.

While the details of these policy changes have not yet been developed, the Minister's announcement introduces potentially significant siting restrictions on renewable generation facilities. Furthermore, with the quantum and framework for reclamation security still under development and uncertainty as to the allocation of transmission costs, the implications for the economics of proposed renewable generation projects remains unclear.

Following the government's announcement, the AUC issued Bulletin 2024-03, providing an update on its application review process to facilitate the March 1, 2024, commencement of approvals being issued. Power plants' applications affected by the pause will be assessed based on their individual merits. Depending on the circumstances of each application and the adequacy of the existing evidence, additional steps may be necessary for applications that are currently under review by the AUC. The AUC will communicate with the parties involved in each existing application to provide details on the next actions to be taken in the process.

Bulletin 2024-03 also indicates that the AUC will initiate a stakeholder consultation to discuss specific subjects within [Rule 007](#).<sup>[4]</sup> These topics will include matters that were addressed during Module A of the inquiry, as well as topics that are the focus of the Alberta government's proposed policy, legislative and regulatory changes, among other items. In September 2023, the AUC issued [interim Rule 007 information requirements](#) [PDF] for new power plant applications related to agricultural land, views, reclamation security and land use planning. These interim information requirements will continue to be in effect for all current and prospective applications following the end of the pause, and the AUC will evaluate whether these interim information requirements should be permanently incorporated into Rule 007 through its consultation. The AUC will provide additional details regarding the Rule 007 consultation process in due course.

[1] The White Area (settled portion) consists of the populated central, southern and Peace River areas of the province. RESOLUTION 3-25: Protection Of Class 3 Soils In Alberta From Renewable Development

- WHEREAS** 32,300 acres of Alberta farmland was lost between 2021-2022 with much of that due to renewable energy projects, such as solar power farms;
- WHEREAS** the Alberta Utilities Commission (AUC) Module A Report focuses only on protecting class 1 and 2 lands and leaves classes 3 to 7 unprotected, while soils in classes 1 to 3 are considered suitable for the sustained production of common field crops;
- WHEREAS** limiting protection to only classes 1 and 2 land leaves over 50 million acres of Alberta’s agricultural land, or more than 80% of the total land, vulnerable to development;
- WHEREAS** increased regulation on class 2 land will most likely result in increased development on class 3 land;
- WHEREAS** food security is a growing global concern due to population growth, unpredictable crop yields, trade disruptions, and the impact of agricultural monopolies, all of which contribute to increasingly volatile conditions;
- WHEREAS** the permanent placement of solar farms on productive land restricts crop rotation and the ability to return the land back to agricultural use; and
- WHEREAS** the AUC reported that the public prefers power plant development on industrial Crown land that’s already been disturbed.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Government of Alberta include the protection for Class 3 agricultural lands, ensuring that these valuable agricultural areas are not left vulnerable to renewable energy development.

**FURTHER THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Government of Alberta continue to implement an “agriculture- first approach” by allowing and prioritizing the approval of renewable power plants on already disturbed sites located on crown land before considering productive agricultural land.

## BACKGROUND INFORMATION

The loss of agricultural land has been a significant concern for the Government of Alberta since the completion of the Land Use Framework Public Consultations in 2008, and it remains a priority as highlighted in the 2023 Annual Report on Land Use Changes.

The Alberta Utilities Commission (AUC) released Module A Report on January 31, 2024. The report addresses issues related to the development of power plants, including the impact on specific classes of agricultural land, and the development of power plants on Alberta's crown lands. However, the AUC observed these issues without making any formal commitments.

Soil classes in Alberta are categorized under the Land Suitability Rating System (LSRS), based on the Canada Land Inventory. Generally, LSRS classes 1 to 3 are considered prime agricultural land, with approximately 40 percent of Alberta's total land in both the green and white zones falling into classes 2 and 3.

According to the 2017 Food Security in the Context of Agricultural Land Loss Report, around 18 percent, or 50.3 million acres, of class 2 and 3 land is either already being used for non-agricultural purposes or remains undeveloped.<sup>1</sup> While the Alberta government believes that the province likely does not have any class 1 land, they directed the AUC on March 1, 2024, to prohibit renewable power plants on class 1 or class 2 agricultural lands due to the potential negative impact on prime agricultural land. However, as outlined in the AUC Module A Report, there is currently no universal consensus on what constitutes 'prime agricultural land.' Some argue that classes 1 to 4 should be considered high-quality agricultural land, with irrigated land also deemed prime, while others suggest that classes 3 and 4 are "moderately productive".<sup>2</sup>

AUC commitments currently extend only to exploring requirements for proponents to provide soil field verification earlier in the application process. Regarding Crown land, the Module A Report indicates that the AUC is not making any commitments to prioritize the development of renewable energy projects on already disturbed sites, and any proposed projects on Crown land must be approved on a case-by-case basis.

The consequences of leaving class 3 land unprotected are substantial, as these lands encompass a significant portion of farmland that greatly contributes to Alberta's agricultural productivity. Northern Alberta, for example, is predominantly composed of class 3 land and already faces challenges due to a shorter growing season.

Over 60 percent of Alberta's land is Crown land. Thermal and hydro power plants, as well as transmission lines, and oil and gas facilities have already been constructed on Crown land. In most provinces where renewable energy developments are permitted on Crown land, the common approach is to make all Crown land available for consideration, but only grant a land disposition where it can be demonstrated that the land use is appropriate. Parks and protected areas, research locations, and areas with community infrastructure and recreation are typically not suitable.

RESOLUTION 4-24: Weed Control In Drainage Canals (Registered Drainage Ditches)

**WHEREAS** under the Weed Control Act of Alberta, Municipalities are tasked to Monitor and Enforce control of Prohibited Noxious and Noxious weeds;

**WHEREAS** the Environmental Code of Practice for Pesticides severely restricts the application of herbicides within 30 metres of a "drainage canal" and the amount of area that can be treated in a calendar year;

**WHEREAS** under a Special Use Approval to apply herbicides within 30 metres of an open body of water, the area allowed to be treated is still restricted; and

**WHEREAS** a Notice to Remedy Weed Problem in a "drainage canal" cannot be fully acted upon due to the limitations of the area allowed to be treated under the Code of Practice allowing for the proliferation of the weeds.

**THEREFORE BE IT RESOLVED  
THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

The Government of Alberta - Environment and Protected Areas remove "drainage canal" from the definition of "open body of water" under the Pesticide Sales, Handling, Use and Application Regulation.

**FURTHER BE IT RESOLVED  
THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

To allow municipalities that have control over maintenance of drainage canals to treat invasive species listed in the Weed Control Act or those species elevated in the respective municipality, as they would control the same species in roadside ditches or under Notice to Remedy Weed Problem.

**SPONSORED BY:** Municipal District of Smoky River #130  
**MOVED BY:** \_\_\_\_\_

**STATUS:** Provincial  
**DEPARTMENT:** Department of Environment and Protected Areas

## BACKGROUND INFORMATION

The Weed Control Act was enacted in 1907 and is in place to prevent the introduction and spread of weeds and to protect agricultural production and native vegetation from the detrimental effects of weed infestations.

The Province of Alberta previously had programs to develop drainage canals (also known as registered drainage ditches) to improve agricultural production in areas with poor drainage or subject to large overland flow. These drainage canals were subsequently turned over to the municipalities for care and maintenance. Part of care and maintenance is adhering to the Weed Control Act and controlling species listed in the regulation and any species that are elevated through municipal bylaw. Many times these canals transfer water in the spring or in heavy rain events and the remainder of the year are dry or have very little water in them similar to a roadside ditch.

The Environmental Code of Practice for Pesticides regulates the application of herbicides within 30 metres of an open body of water, of which drainage canals are classified as. By following the code of practice municipalities are restricted to treating 10% of 100 square metres in a zone 1 - 5 metres from an open body of water with certain active ingredients, and up to 30% of an area from 5 - 30 metres from an open body of water with other active ingredients. This small area of application just allows weeds and deep-rooted perennial weeds such as Toadflax and Canada Thistle to proliferate uncontrolled thereby affecting native vegetation and encroaching into farmland. Under section 9(4)(b) of the Environmental Protection and Enhancement Act - Pesticide (Ministerial) Regulation "(b) a person using or applying pesticides on cultivated land." is exempt from a special use approval in the 30 metre zone to an open body of water. This is a two-tiered system which restricts municipalities from controlling weeds on lands they are in control of.

Resolution #6 in 1989 being *Problem Vegetation Control on Drainage Ditches* identified the issue of weed control in drainages. Weed control in drainage ditches is not a new or isolated issue.

**"THEREFORE BE IT RESOLVED**

*that Alberta Environment draft a standard set of instructions and precautions and issue one permit to each Municipality which would cover all applications to any ditches within that Municipality in that year."*

There is also a jurisdictional question between the Weed Control Act and the Environmental Code of Practice which poses the question as to which has paramountcy? Municipalities are charged with upholding the Weed Control Act but are hindered by the Act, Code and Regulation. Even under a Notice to Remedy Weed Problem for Prohibited Noxious where all growing parts of the plant are to be destroyed this is not likely to occur due to the restrictions in the Code of Practice as is seen in 11(A) in the Code of Practice for Control of Purple Loosestrife.

## Pesticide Sales, Handling, Use and Application Regulation

- (II) "open body of water" means the bed and shore of an irrigation canal, drainage canal, reservoir, river, stream, creek, lake, marsh or other body of water, but does not include the following:
- (i) waterworks systems;
  - (ii) reservoirs, lakes, marshes or other bodies of water that are completely surrounded by private land, that have an area of less than 4 hectares and have no outflow of water beyond the private land;
  - (iii) reservoirs, lakes, marshes or other bodies of water that are located on public land, that have an area of less than 0.4 hectares, and have no outflow of water;
  - (iv) irrigation and drainage canals that are completely surrounded by private land and have no outflow beyond the private land;
  - (v) roadside ditches;
  - (vi) wastewater systems;
  - (vii) storm drainage systems;
  - (viii) dry streams having a bed and shore averaging 0.5 metres or less in width within the boundaries of the treatment area;
  - (ix) a constructed water hazard that is located on a golf course and has no outflow of water beyond the golf course boundary;

## Environmental Protection and Enhancement Act - Pesticide (Ministerial) Regulation

**Special use approval**

**9(1)** No person shall, unless the person holds a special use approval issued by the Director,

- (a) use or apply a pesticide in or on an open body of water,
- (b) use or apply a pesticide listed in Schedule I, 2 or 3 within a horizontal distance of 30 metres from an open body of water,
- (c) store a pesticide within a horizontal distance of 30 metres from an open body of water, or
- (d) wash equipment or vehicles used to apply pesticides within a horizontal distance of 30 metres from an open body of water.

**(2)** Subsection (1)(p) does not apply to a person using or applying a fish toxicant in accordance with a written authorization issued by the Director of Fisheries Management of the Department.

**(3)** Subsection (1)(a) and (1)(b) do not apply to a person using or applying a vertebrate toxicant bait in, on or within 30 horizontal metres of a frozen open body of water pursuant to a Government pest control program.

**(4)** Subsection (1)(b) does not apply to

- (a) an applicator using or applying pesticides in accordance with the latest edition of the *Environmental Code of Practice for Pesticides* published by the Department, or
- (b) a person using or applying pesticides on cultivated land.

**Application for special use approval**

**10** An applicant for a special use approval must submit an application in a form acceptable to the Director containing the following information:

- (a) the name and address of the applicant;
- (b) the location of the area to be treated;
- (c) the pest to be controlled;
- (d) the name of the pesticide to be used;
- (e) alternative pest management strategies that have been investigated;
- (f) any other information the Director may require.

#### Environmental Code of Practice for Pesticides

#### Pesticide Application Within 30 Horizontal Metres of an Open Body or

##### **Water**

- 16 (1)** In this section "deposit" means depositing an amount that results in visible effects on vegetation or an amount that is likely to cause an adverse effect.
- (2)** All applications must be conducted or supervised by
- (a) the holder of a certificate of qualification for pesticide application, or
  - (b) the holder of a certificate recognized by the Director.
- (3)** Subsection (2)(b) does not apply to pesticide applications made under the provisions of subsections 16(12).
- (4)** The application must not result in the deposit of pesticides into or onto any open body of water except in accordance with subsection 16(12).

- (5) Applications must not be made within 250 metres upstream of any surface water intake of a waterworks system.
- (6) Aerial applications of pesticides to land must not be conducted while flying directly over an open body of water.

#### Herbicide Applications - General

- (7) Herbicides must not be deposited within 30 horizontal metres of an open body of water unless the herbicide application is conducted by ground application equipment only.
- (8) Herbicides must not be deposited on areas that have slumped, been washed out or are subject to soil erosion into the water body.
- (9) Unless otherwise specified in the manufacturer's product label, applicators may apply the herbicides listed in Table: 1 provided that
- (a) herbicides are not deposited closer than 1 horizontal metre from an open body of water;
  - (b) applications are conducted for
    - (i) the control of herbaceous plants classified as weeds named under the *Weed Control Act*; or
    - (ii) control of woody plants less than 1.5 metres in height, to areas where the woody plants interfere with forest generation or the safe operation, functioning, or maintenance of man-made structures such as dams, canals, drainage ditches, roads, industrial facilities, or utility or pipeline rights-of-way;
  - (c) applications are made selectively using
    - (i) a backpack sprayer,
    - (ii) a pump-sprayer,
    - (iii) a hand-gun sprayer, or
    - (iv) an application method that targets individual plants; and
  - (d) no more than 10 percent of any 100 square metres in the zone 1 -5 metres from an open body of water receives treatment in any calendar year.

---

**Table 1**

- aminopyralid (what used up to a maximum application rate of 0.12 kg/ha)
  - chlorsulfuron
-

- 
- glyphosate
  - metsulfuron methyl (when used up to a maximum application rate of 0.09 kg/ha)
  - triclopyr (when used up to a maximum application rate of 1.92 kg/ha)
- 

(6) Unless otherwise specified in the manufacturer's product label, applicators may apply the herbicides listed in Table 1 or Table 2 provided that

- (a) herbicides in Table 2 are not deposited closer than 5 horizontal metres from an open body of water;
- (b) applications are conducted for:
  - (i) the control of herbaceous plants classified as weeds named under the *Weed Control Act*; or
  - (ii) the control of woody plants in areas where the woody plants interfere with forest regeneration or the safe operation, functioning, or maintenance of man-made structures such as dams, canals, drainage ditches, roads, industrial facilities, or utility or pipeline rights-of-way; and
- (c) applications are selectively using a backpack sprayer, a pump-sprayer, a hand-gun sprayer, a boom or boomless sprayer, or an application method that targets individual plants;
- (d) no more than 30 percent of any 100 square metres in the zone 5-30 metres from an open body of water receives treatment in any calendar year.

Table 2

- 2,4-D (when used up to a maximum application rate of 1.4 kg active ingredient per hectare).
- aminopyralid (when used up to a maximum application rate of 0.12 kg active ingredient per hectare)
- dicamba (when used up to a maximum application rate of 1.2 kg active ingredient per hectare)

- 
- MCPA (when used up to a maximum application rate of 0.675 kg active ingredient per hectare)
  - triclopyr
- 

(11) Unless otherwise specified in the manufacturer's product label, applicators may apply herbicides for specific vegetation management

situations as follows:

- (a) **Purple Loosestrife** (*Lythrum solicaria*) may be treated with glyphosate or triclopyr, applied selectively by **backpack** or hand- pump sprayer to purple loosestrife growing on dry land provided that:
  - (i) no herbicide is deposited closer than 1 horizontal metre from standing water, and
  - (ii) no more than 10 percent of any 100 square metres of land closer than 1 metre from an open body of water receives treatment in any calendar year.
- (b) **Front Regeneration Siles** may be treated with glyphosate applied selectively or non-selectively by aircraft or ground equipment provided that glyphosate is not deposited within 5 horizontal metres from an open body of water.
- (c) **Non-Vegetated Developed Areas** such as maintained trails, roads, vehicle parking lots, railway ballasts, shoreline rip-rap or armour, water management structures and industrial sites such as flare stacks, pump sites, equipment yards, and electrical substations may be treated with glyphosate selectively or non-selectively by ground application equipment over the entire area that is to be maintained non-vegetated.
- (d) **Railway Ballasts** may be treated with imazapyr provided that no herbicide is deposited within 15 horizontal metres of an open body of water.

## RESOLUTION #6

PROBLEM VEGETATION CONTROL ON DRAINAGE DITCHES

- WHEREAS Drainage ditches are often infested with thistles and other noxious weeds; and
- WHEREAS Weed seeds produced in and adjacent to these ditches are often capable of moving over long distances when water flows in these ditches; and
- WHEREAS Weed problems are often not discovered until mid summer; and
- WHEREAS Delays of up to three months in receiving permits to apply herbicides mean that control cannot be achieved before seed set in that season; and
- WHEREAS Cultural control methods are most often expensive, time consuming and not effective in these situations; and
- WHEREAS Most permits issued contain virtually identical directions and precautions to be observed when applying herbicides,
- THEREFORE BE IT RESOLVED that Alberta Environment draft a standard set of instructions and precautions and issue one permit to each Municipality which would cover all applications to any ditches within that Municipality in that year.

Sponsored By: Improvement District #16

Status: Provincial Department: Alberta Environment

Branch: Pollution Control

## AGRICULTURAL SERVICE BOARDS

## RESOLUTION #6

## PROBLEM VEGETATION CONTROL ON DRAINAGE DITCHES

BE IT RESOLVED that Alberta Environment draft a standard set of instructions and precautions and issue one permit to each Municipality which would cover all applications to any ditches within that Municipality in that year.

## Response

Alberta Environment:

Alberta Environment issues permits to apply pesticides on, in, or within 30 horizontal metres of drainage ditches. Permit applications are reviewed by Alberta Environment and Alberta Forestry, Lands and Wildlife to assess potential environmental impacts and impart mitigating conditions to permits.

We recognize that in some instances the nature of a weed problem may be such that a municipality may not know precise spraying locations at the time when permits must be applied for. In these cases, we have worked with the municipalities involved and have developed a suitable system.

We accept permit applications where the municipality has identified the water courses to be involved in the spray program. Specific areas to be sprayed along the water courses need not be identified if they are not known at the time the permit application is made.

If permit applications are submitted well in advance of the spray season, a municipality will encounter no delays in implementing their spray programs in a timely manner.

RESOLUTION 5-25: Central Contact for the *Weed Control and Agricultural Pest Acts*

**WHEREAS** the lack of centralized point of contact can lead to delays in addressing weed and pest issues, resulting in possible environmental and economic impacts;

**WHEREAS** there are thousands of oil and gas wells, including abandoned wells, across Alberta where site maintenance following the *Weed Control Act* and *Agricultural Pests Act* must be followed;

**WHEREAS** challenges often stem from incorrect contact information and changes in leaseholders that are not consistently updated, hindering communication and compliance;

**WHEREAS** government agencies have multiple offices throughout the province, and ministry changes cause difficulties providing the information to the appropriate contact; and

**WHEREAS** municipalities face significant challenges in enforcing the *Weed Control Act* and *Agricultural Pests Act* due to difficulties in establishing and maintaining contact with landholders.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Ministers of Energy, Environment and Ag work collaboratively to establish a central point of contact for identifying landholder to send communication to industry and government agencies for matters related to agriculture legislation. This would involve municipalities sending notices and other communications regarding the Acts to a central government contact, who would then distribute the information to the respective landholders.

**STATUS:** Provincial

**DEPARTMENT:** Energy and Minerals  
Environment and Protected Areas  
Agriculture and Irrigation  
Transportation and Economic Corridors

**BACKGROUND:**

Effective control of weeds & pests is critical for maintaining the ecological balance and agricultural productivity of a region. Inspectors play a key role in this effort by enforcing the *Weed Control Act & Agricultural Pests Act* by issuing notices. This act requires landholders to manage and control the spread of weeds & pests on their properties. When landholders fail to comply, municipalities are allowed to enforce these notices.

However, the enforcement of these notices faces significant challenges, one being the difficulty in contacting the owners of oil and gas well sites. Multiple changes in leaseholders can cause inaccurate contact information leading to frustration and inefficiencies for municipal inspectors. This lack of reliable contact information results in many notices of non-compliance remaining unresolved, as the inspectors are unable to reach the responsible parties.

Government changes throughout the years along with multiple offices have led to land information being addressed to various locations and often mis-directed which results in mail being returned to sender causing further delays. Ministry changes have also compounded this issue. Certain municipalities must deal with multiple local government jurisdictions which further fragments communication.

With accurate and accessible contact details, the process of enforcing notices would become more efficient, reducing the number of unresolved cases and improving overall compliance with the *Acts*. To address this issue, the implementation of a central contact is proposed. This would involve municipalities sending communications regarding the Acts to a central government contact, who would then accurately distribute the information to the respective agencies.

RESOLUTION 6-25: Rural Veterinary Student Support

**WHEREAS** veterinary services are a critical component of rural sustainability through the industry’s contributions to agriculture, food safety and animal welfare;

**WHEREAS** the Government of Alberta currently provides a Veterinary Student Bursary to veterinary students living and working in Northern Alberta via the Northern Alberta Development Bursary Program;

**WHEREAS** veterinary student temporary employment subsidies exist in other jurisdictions struggling to attract and retain rural veterinarians;

**WHEREAS** costs associated with completing the necessary educational requirements to become a veterinarian continue to increase; and

**WHEREAS** rural Alberta is experiencing a continued decline in veterinarian availability.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Ministry of Jobs, Economy, and Trade and Ministry of Advanced Education create a complimentary program to the Northern Alberta Development Program Veterinary Student Bursary, to make bursary funds accessible to veterinary students working in mixed and large animal veterinary clinics throughout rural Alberta.

**FURTHER THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Ministry of Agriculture and Irrigation and Ministry of Jobs, Economy and Trade institute a veterinarian student temporary employment program for rural mixed and large animal veterinary clinics to support the attraction and retention of veterinary students throughout rural Alberta.

**SPONSORED BY:** Lacombe County

Ministry of Agriculture and Irrigation

## BACKGROUND INFORMATION

Several resolutions have been accepted in the past addressing the shortage of rural veterinarians in Alberta, and we applaud the positive movement we have seen on this issue including the work already underway by the Alberta Veterinary Medical Association, University of Calgary and Alberta Government. Based on what we have learned following previous resolutions and the conversations between Lacombe County and local veterinarians, we believe that the actions listed in this resolution will continue to increase the availability of rural veterinarians throughout Alberta.

In the Spring of 2024, Lacombe County surveyed veterinarians within the County. Six veterinary practices were provided with the survey which was completed by seven veterinarians. Highlights of the survey responses are identified below:

- 71% of respondents identified that there is currently a shortage of large animal vets within/servicing Lacombe County.
- 100% of respondents identified that there will be a shortage of large animal veterinarians in Lacombe County within the next 10-15 years. Respondents also identified that the anticipated shortage is based on feedback from clients, an inability to keep up with requests from clients and a shortage of qualified individuals to fill vacant roles.
- 86% of respondents identified job factors (work hours, work-life balance, dealing with difficult people) as the main challenge facing the large animal vet industry.
- Access to professional mentorship was identified as the main factor impacting the retention of veterinary students in Lacombe County.
- 85% of respondents identified that the attraction of vet students is best addressed by a combination of municipal government and local clinics.
- 57% of respondents identified subsidies for vet clinics hosting vet students as the most impactful vet student support.

To support veterinary students, Lacombe County has instituted a veterinary student billet program which connects veterinary students with local families and producers while students complete their practicum rotation with a local veterinary clinic. The goal of this program is to connect students with affordable short-term housing and members of the community to foster the student's connection with the community. Additionally, Lacombe County sponsors a \$1,850 veterinary student scholarship in partnership with Red Deer Polytechnic to financially support local veterinary students.

The challenges facing the veterinary industry within Alberta, and across Canada are well documented. Feedback from local veterinary professionals and students has identified several concerns relating to the veterinary industry provincially and locally. This includes financial constraints faced by students due to the cost of schooling and operational challenges relating to the additional costs or inability to afford students for summer positions by clinics.

The Northern Alberta Development Bursary Program, Veterinary Student Bursary, is funded and administered by the Ministry of Advanced Education and Ministry of Jobs, Economy and Trade. This bursary provides funding for veterinary students to live and work in Northern Alberta. Students may apply for the \$7,000 bursary annually for the full length of their veterinary program to a maximum of four years and has been active since 2011. To receive the bursary funds, the student must sign a return of service agreement identifying that the student must return to work in northern Alberta for each year the bursary is paid. If the student does not return to Northern Alberta for work, the student must repay the amount.

As previously discussed, operational challenges are also faced by rural veterinary clinics to attract veterinary students to open opportunities or clinics being unable to afford to hire a veterinary student. As a solution, the Manitoba government has instituted the Veterinary Student Employment Program (VetSTEP) which provides funding to mixed and large animal clinics in rural Manitoba that employ veterinary students. Clinics are eligible for funding up to \$6,500 for employing first year students and \$5,000 for second and third year students. Students must work a minimum of 471.25 hours for the participating clinic to receive the full subsidy. In 2023, the Manitoba VetSTEP program funded summer work for 21 veterinary students to work in rural Manitoba.

The challenge of attracting and retaining veterinary students to rural Alberta, along with the financial costs borne by veterinary students is a concern faced throughout rural Alberta. By implementing a province-wide rural Alberta veterinary student bursary program, and veterinary student temporary employment program there may be a higher likelihood of attracting students to spend the summer months working with rural veterinary professionals. Additionally, the time spent working in rural practices may allow students to connect with the community, be mentored, and remain in rural Alberta following graduation.

Previous Resolutions:

- 1-23: Creation of a Mid-Level Alberta Veterinary Medical Association (AbVMA) Professional Designation
- 2-23: Rural Veterinary Students
- RMA 3-22S- Attraction and Retention of Veterinarians to Rural Veterinary Practice

## RESOLUTION 7-25: Roadkill Carcass Disposal

**WHEREAS** the Alberta Minister of Transportation and Economic Corridors stated in a letter received on September 12, 2024, that Alberta Environment and Protected Areas (EPA) and Alberta Forestry and Parks (FP), the administrators of the Wildlife Act, do not currently “have formal guidance for the disposal of wildlife animal carcasses. However, both departments strongly recommend minimizing handling and transport of carcasses due to... disease transmission,” further stating that any departure from these current disposal methods would require EPA and FP to issue permits under the Act for each carcass transported;

**WHEREAS** Highway Maintenance Contractors frequently transport carcasses to disposal and stockpiling sites that are easily accessible to the public and become utilized for the disposal of dead livestock and roadkill, through scavenger disposal;

**WHEREAS** the proximity of these disposal sites to active livestock production increases the impact of predators on livestock by providing a plentiful and easily accessible food source during winter scarcity; and

**WHEREAS** this disposal method comes with a high probability of disease spread through the landscape, including but not limited to foot-and-mouth disease, which infects deer and would cost billions of dollars in lost markets to the province and the country, and chronic wasting disease, a prion disease that is resistant to environmental degradation.

### THEREFORE BE IT RESOLVED

#### THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST

Alberta Environment and Protected Areas and Alberta Forestry and Parks to develop formal guidance on the disposal of wildlife carcasses hit by vehicles to minimize disease transmission vectors that may pose a serious economic threat to the livestock industry, such as foot-and-mouth disease.

### THEREFORE BE IT FURTHER RESOLVED

#### THAT THE AGRICULTURAL SERVICE BOARDS REQUEST

That Alberta Transportation amend the Standard Specification for Highway Maintenance to require contractors to maintain controlled access to carcass disposal sites, the composting of roadkill carcasses, and that the site be a minimum of 8 kilometers from an active livestock operation.

**SPONSORED BY:** Municipal District of Greenview #16

**MOVED BY:** \_\_\_\_\_

**SECONDED BY:** \_\_\_\_\_

**CARRIED:** \_\_\_\_\_

**DEFEATED:** \_\_\_\_\_

**STATUS:** Provincial

**DEPARTMENT:** Alberta Transportation and Economic Corridors  
Alberta Agriculture and Irrigation  
Alberta Forestry and Parks  
Alberta Environment and Protected Areas

### BACKGROUND INFORMATION

Since early 2023, Greenview has been in discussion with Alberta Transportation to address a roadkill carcass disposal site that has been identified as a contributor to predation of livestock

in the vicinity of the site. While located on crown land, the site is adjacent to livestock operations and has no controlled access. The location is being utilized by the public for disposal of dead livestock, equine, as well as roadkill.

Through these discussions, we found that this is an acceptable disposal method for Alberta Transportation throughout the province, as Highway Maintenance Contractors seek roadkill carcass disposal sites that are central to their operations and low cost. Unfortunately, these sites are not controlled access and the challenges seen in Greenview are mirrored in other locations. We believe this is an oversight that we wish to bring to the attention of all identified ministries.

The municipal concern for this practice is threefold; Firstly, easily accessible food sources in harsh winter months artificially support predator populations, removing the population control factor of scarce food. Secondly, Chronic Wasting Disease (CWD), a prion disease that is resistant to environmental degradation, is spreading throughout Alberta and represents a threat to Alberta Elk producers. Lastly, this biosecurity concern could extend to Foot and Mouth Disease, African Swine Fever, Porcine Endemic Diarrhea, and a host of other contagions, many of which could cost Alberta and the Country of Canada billions of dollars in lost markets. It is in the interest of the Provincial Government to address these biosecurity risks as a proactive way of preventing a costly livestock emergency, also representing a potential threat to the livelihoods of Alberta livestock producers.

## RESOLUTION 8-25: Coyotes Eligible For Compensation

- WHEREAS** coyotes are currently listed as a nuisance under the Pest and Nuisance Control Regulation pertaining to the Agricultural Pests Act of Alberta;
- WHEREAS** coyotes are an adaptable, relentless and reproductive predator with most producers having faced economic loss due to their predation;
- WHEREAS** wild boar are listed as a pest under similar legislation and the Province has a proactive coordinated approach to eliminating the threat of invasive wild boar, involving compensation for eligible damages to unharvested crops, stacked hay, stacked greenfeed, as well as silage and haylage in pits and tubes through AFSC's Wildlife Damage Compensation Program;
- WHEREAS** the Wildlife Damage Compensation Program is cost shared between the federal and provincial governments; producers pay no premium or administration cost;
- WHEREAS** other neighboring Provinces pay compensation for coyote predation and even bounties that are funded in a similar manner; and
- WHEREAS** it is our determination that because the Province does not proactively mitigate coyote predation, producers are entitled to fair compensation arising from damages caused by predation of livestock.

**THEREFORE BE IT RESOLVED****THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Minister of Agriculture and Irrigation under Section 3 of the Agricultural Pests Act of Alberta establish a Federal-Provincial cost shared program to mitigate and compensate producers for confirmed coyote predation on livestock, work with the Ministries of Forestry and Parks and Environment and Protected Areas to utilize Fish and Wildlife staff to confirm the predation and submit confirmation forms to AFSC for payment administration.

**FURTHER THEREFORE BE IT RESOLVED****THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Minister of Agriculture and Irrigation, Forestry and Parks, and Environment and Protected Areas consult with Alberta Lamb Producers and Alberta Beef Producers to adopt their proposed changes to the current Wildlife Predator Compensation Program to provide more fair compensation when predation occurs.

## BACKGROUND INFORMATION

### Summary Points:

- Alberta does not pay for coyote kills but other Western provinces do. They utilize cost share funding with the Federal government for wildlife compensation.
- Saskatchewan paid nearly \$2.3M on the 5 year avg for confirmed coyote predation. That is a huge amount to ask producers in Alberta to cover, this still does not take into account missing livestock.
- Alberta's current Wildlife Compensation Program has an approximate 10 yr avg payout of \$391,000.00 Alberta wide, which is much lower than Saskatchewan and we have more livestock.
- Predation has both direct and indirect costs. Lots of predation is not reported or never found.
- Direct costs are losses from found confirmed kills.
- Indirect losses can be, but not limited to decreased gain, lower conception, missing animals, wounded animals, discounts at market, stress, mental health, and increased time surveilling.
- Agriculture and Irrigation in conjunction with the federal government, Alberta Pork and AFSC administer compensation arising from Wild Boar damages and a trapping program. Both are listed in similar legislation, why can livestock producers not get a similar program for coyotes?

Currently coyotes are listed under the Agricultural Pest Act which offers producers assistance through Form 7 and 8 under the Pest and Nuisance Control Regulation, creating a compensation program would allow livestock producers to seek out compensation for death or injury to livestock caused by coyotes similar to how crop and pasture producers can apply for compensation for damages to their business.

Alberta is the only Western province to not include coyotes as part of the predatory compensation program. The report "Impact of Wildlife to Beef Producers in Alberta", by the Miistakis Institute in 2015, showed that 65% of Alberta beef producers are impacted by coyote predation. We lack hard relevant data in Alberta and rely on producer surveys or old 40+ year old data. Currently Fish and Wildlife is doing most the verification on confirmed kills, but doesn't seem to keep or provide data on species that are not listed as eligible species for compensation under the current Wildlife Predator Compensation Program. Please see below the 1975-1981 data from the 1982 Compensation For Vertebrate Pest Damage at the Vertebrate Pest Conference.

Table 1a-c offers a look at predator claims from 1975-1981<sup>1,2</sup> and Table 2: Predators Compensation Programs in Western Canada offers a comparison between Alberta, British Columbia and Saskatchewan.

\*\*\* Adjustment for increased livestock market values.

<sup>1</sup> Gurba, Joseph. Compensation for Vertebrate Pest Damage. 1982 <<http://digitalcommons.unl.edu/vpc10/18/>>

<sup>2</sup> It is estimated that several times the amount of predator loss of livestock goes undetected or cannot be proven and validated to the satisfaction of government officers (Gurba, 93)

A comparison of the predator compensation programs in Western Canada best attributed from information obtained online or over the phone.

Table 2: Comparison of Predator Compensation Programs

|   | Alberta  | British Columbia   | Manitoba   | Saskatchewan  |
|---|--|--|--|---|
| <b>Who runs the program</b>                 | F&W, Environment and Protected Areas   | BC Cattlemen's   | Manitoba Agriculture Services Corporation  | Saskatchewan Crop Insurance Corporation   |
| <b>Funding</b>                              | Alberta Conservation Association through a levy on hunting and angling licenses  | 60% Federal Government, 40% Provincial Government  | 60% Federal Government, 40% Provincial Government, up to 80% of livestock value. Beyond 80% is covered by the province.                                    | 60% Federal Government, 40% Provincial Government, up to 80% of livestock value. Beyond 80% is covered by the province.     |
| <b>Compensation for livestock predation</b> | 100% value of the market value   | 80% of market value  | 90% value  | 100% value (minimum for cattle of \$400) 1.5x on purebreds  |
| <b>Compensation for suspected predation</b> | 50% value  | None   | 45% value  | 50% value   |
| <b>Compensation for livestock injury</b>    | 100% animal value for veterinary costs   | Vet costs covered up to the value of animal, if the animal dies they pay the difference.                   | Losses also include all reasonable veterinary and medical expenses incurred to treat injured livestock (up to the value of the animal).                    | 80% animal value for veterinary costs   |
| <b>Value based on</b>                       | Highest of the Can Fax price for the week before, the week of, and week after the loss. For calves producers can choose to wait for the Can Fax October price for fall weight 550 lbs. | The compensation rates are set usually in April or May and they use the WLPPI to set a price for the year. | Commercial market prices are derived from either the CanFax Weekly Summary or a price list. Purebred are valued at double. Capped at \$3000.00 per animal. | Highest of the market sales for the week before, the week of, and week after the loss (minimum for calf in 2024 is \$2136). |
| <b>Eligible livestock</b>                   | Cattle, sheep, goats, swine, bison   | Cattle and sheep   | Cattle, horse, sheep, hogs, wild boars, goats, elk, fallow deer, bison, llamas,  | Cattle, sheep, goats, bison, horses, hogs (excluding wild boar), elk, fallow deer,  |

|                          |                           |  |  |   |
|--------------------------|---------------------------|--|--|---|
|                          |                           |  | donkeys, ostriches, emus and other ratites | llamas, donkey, ostrich, emu, ducks, geese, chickens, turkeys   |
| <b>Eligible predator</b> | Bear, cougar, eagle, wolf | Wolves, coyotes, bears, cougars, ravens and eagles | Bear, cougar, coyote, fox, wolf            | Coyote, cougar, lynx, fox, wolf, eagle, birds of prey, scavenging birds, raccoon, skunk, badger, mink, weasel, any other wild animal that causes injury or death to eligible livestock. |

Table 3: Saskatchewan Predator Compensation 5 yr payouts and the percent compensation due to coyotes.

| <b>Average</b> | 3,368                         |                                | \$ 2,294,306.80     |                                      |

Please see attached pdf regarding **2024 Alberta Livestock Inventory Estimates**. Alberta has the most rangeland livestock of any province or territory in Canada and Alberta pays out the least amount of financial compensation in the event of predation in Western Provinces. Is it fair to require our producers to eat the cost of feeding the Crowns animals when other provinces are compensating more?

Proposed changes producer groups are requesting to existing Wildlife Compensation include:

- Move to compensate at a rate of 2.5x on confirmed kills
- Compensate probable kills at 100%, rather than 50%
- Eliminate the current requirement of a second kill by the same predator species within 10 km and 90 days, in order to pay on a probable
- Compensate at 1.5x when the producer can verify that the animal in question was a purebred (this could also be determined by evaluating the market price for breeding stock)
- Compensate for livestock guard animals killed by predators
- Compensate for bulls at 1.75x canfax cull price (market price will likely dictate price of bulls)
- Compensate for breeding cows and heifers using the following formula:
  - $1.75 \times 1400 \text{ lb.} \times D1/D2$  price (same as above comments for breeding stock)
- For feeder yearlings, give producers the option of receiving value at time of death or Canfax fall average at 950 lb. (similar to option on calves)
- Certify producers and other government staff in the verification of predator kills

RESOLUTION 9-25: Non-Matching Funding For Agknow

**WHEREAS** the farming population is at a high risk of mental illness when compared to the general population;

**WHEREAS** studies and surveys have shown that farmers are less likely to seek mental health care due to associated costs, lack of time during the day, and counselors lacking an understanding of agriculture;

**WHEREAS** the AgKnow, Alberta Farm Mental Health Initiative was established in 2022 with the intent to provide Alberta’s farming population with agriculturally-informed mental health supports;

**WHEREAS** AgKnow, Alberta Farm Mental Health Network has received grants for project-based services through the Sustainable Canadian Agricultural Partnership, which has 50% matching funds requirement; and

**WHEREAS** AgKnow, Alberta Farm Mental Health Network faces funding gaps and restricted operating funds, leading to jeopardization of high-demand mental health programming and support services currently being delivered to Alberta’s farming population.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Minister of Agriculture and Irrigation waive the matching funding requirement through Sustainable Canadian Agricultural Partnership to support AgKnow, Alberta Farm Mental Health Network to ensure that the Farm-Informed Therapy Program for agricultural producers continues to grow and is free of charge in Alberta.

**DEFEATED:** \_\_\_\_\_

**STATUS:** Provincial

**DEPARTMENT:** Ministry of Agriculture and Irrigation

**BACKGROUND INFORMATION**

Agriculture is one of the most important industries to Alberta’s economy. Alberta is one of the most productive agricultural economies in the world, employing approximately 69,000 people and contributing \$10.3 billion to the provincial economy in 2022. <sup>i</sup> Alberta is home to 41,505 farms according to the 2021 Census, which was a 2.1% increase over the 2016 Census. <sup>ii</sup> This is an interesting finding given that the historically, farm numbers across Canada have declined year over year as illustrated below.

Total Number of Farms by Province, 1951 - 2016<sup>iii</sup>

Source: Statistics Canada, CANSIM Tables 004-0001 and 004-0237

This increase in farm numbers shows that farming and ranching remains an important way of life for Albertans.

Preliminary results from a 2023 survey conducted by Dr. Rebecca Purc-Stephenson of the University of Alberta regarding stress, mental outcomes and coping strategies of Alberta farmers had some interesting results. The survey found that 66.7% of Alberta farmers experienced

depression, 78.5% experienced anxiety, and higher than average rates of burnout characterized by exhaustion, cynicism, and low self-esteem.<sup>iv</sup>

Farmers are less likely to seek help for their mental health when compared to the general population. A 2021 study from the University of Guelph evaluated barriers and motivations for seeking mental health support with a group of 75 Ontario farmers. The main barriers to seeking mental health support were as follows:

- Lack of accessible mental health supports;
- Lack of anonymity in seeking mental health support;
- Stigma about mental health in the agricultural community; and
- Feeling that healthcare providers don't understand the "culture of farming".<sup>v</sup>

Due to the economic importance of the agricultural sector, and the growing number of the population entering the industry, the susceptibility of farmers suffering from mental health struggles, and the overall reluctance for farmers to engage with current mental health supports, it is imperative that the Province support appropriate mental health care to ensure the long-term success and survival of the agricultural industry.

At the 2019 Provincial ASB Conference, Resolution E1-19: Access to Agriculture Specific Mental Health Resources was passed. The resolution asked for the Province to provide a 24/7 crisis line providing the farming population with access to agriculturally-informed professionals and resources.

#### **EMERGENT RESOLUTION E1-19**

#### **ACCESS TO AGRICULTURE-SPECIFIC MENTAL HEALTH RESOURCES**

- WHEREAS** Agriculture is economically essential, both provincially and federally, and agriculture needs healthy farmers to function;
- WHEREAS** Agriculture is a stressful occupation, which has become especially clear with three consecutive years of poor harvests, livestock feed shortages and other effects of climate change;
- WHEREAS** Despite mental illness diagnoses increasing, a large stigma exists around mental illness and asking for help which is especially prominent in industries like agriculture where members are isolated and have a distinct workplace culture of not requesting help;
- WHEREAS** Alberta does not have an agriculture-specific mental health crisis line, although neighbouring provinces do (e.g. Saskatchewan);
- WHEREAS** 310-FARM is a well-known and commonly utilized number that can direct callers to an abundance of resources, but only offers agronomic information during office hours;

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Provincial Government of Alberta facilitates the formation of a free, year-round, all hours, mental health crisis hotline, dedicated to the agriculture industry, providing farmers with direct access to uniquely qualified professionals and resources, whom have both an understanding of mental health issues and agriculture-specific stresses.

**FURTHER THEREFORE BE IT RESOLVED**

**THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Provincial Government of Alberta secure long term, sustainable funding for the operation and maintenance of this mental health crisis hotline.

Additionally, at the 2023 ASB Provincial Conference, another resolution was passed, Resolution E2-23, Stable Funding for Farm Mental Health. This resolution focused on the need for stable, 5-year funding for AgKnow, Alberta Farm Mental Health Network so that they could continue to grow their reach and programing. The resolution follows:

**RESOLUTION E2-23**

**STABLE FUNDING FOR FARM MENTAL HEALTH**

**WHEREAS** Canadian research shows that farmers currently have 20% more moderate and severe anxiety and depression than the general population, and 1 in 4 farmers had suicidal thoughts in the past 12 months;

**WHEREAS** An Alberta white paper released in spring of 2022 recommends the creation of a farm mental health network to create specific mental health resources and service accessible to farm families;

**WHEREAS** the Ministry of Agriculture and Irrigation has supported the above recommendation by providing a one off grant for the development of the AgKnow initiative in November 2022 which expires in March 2023;

**WHEREAS** The Alberta Farm Mental Health Network (AgKnow) is looking for operational funding to continue to pilot the free counselling session and other initiatives that make supports affordable and accessible to farm families;

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Minister of Agriculture and Irrigation provides stable 5 year funding support to the Alberta Farm Mental Health Network to hire and maintain staff and cover operational costs to continue the support and services offered through AgKnow.ca.

**SPONSORED BY:** \_\_\_\_\_ MD Peace \_\_\_\_\_

**CARRIED**

**STATUS:** \_\_\_\_\_ Provincial \_\_\_\_\_

**DEPARTMENT:** Ministry of Agriculture and Irrigation,

AgKnow, Alberta Farm Mental Health Network was established in 2022 as an initiative of the Agricultural Research and Extension Council of Alberta (ARECA) in response to Emergent Resolution E1-19. ARECA was provided a one-off \$524,500 grant through the Canadian Agricultural Partnership (CAP) for the development of AgKnow and farm mental health supports. This funding helped achieve the following: hiring of team members, research contracts, launch the AgKnow.ca website, a platform to connect farmers with agriculturally-informed therapists, and launch the Livestock Depopulation Support Program.

During late 2023 and early 2024, AgKnow conducted a survey with the goal of gathering insights to shape the development of mental health initiatives tailored to the needs of the Alberta agricultural community. Participants were asked about the importance of having access to farm-informed counselors. Preliminary results showed 70% found it important, 24% somewhat important, and 6% not important. The primary reasons for seeking or contemplating counselling services were family dynamics (such as relationships with spouses, children, and extended family members) and coping with mental illness (like depression, anxiety, or dementia). These were followed by challenges related to managing financial stress on the farm, navigating farm transition/succession, and seeking grief support, respectively. Additionally, participants who had not sought counselling were asked to provide their reasons for not pursuing support. The top three reasons provided in the survey were cost, not having enough time during the day, and counselors lacking understanding of agriculture.<sup>vi</sup>

AgKnow has developed a number of services that have garnered very positive results in a short period of time. The Farm-Informed Counselling Program is a particular program of importance. Participants can see each therapist bio, including their agricultural background, professional qualifications, specialties, and their availability for in-person, virtual, and after-hours service. Allowing participants to book with the therapist right for them. This program has engaged with 19 agriculturally-informed therapists who have provided 123 free therapy sessions as of June 2024. This program was piloted offering two free sessions per participant, and has tripled in participation since February 2024, clearly showing the high demand for the programming.

Currently, AgKnow can access project-based funding through the Sustainable Canadian Agricultural Program (SCAP) under the Resiliency and Public Trust stream. However, this funding

has a 40% matching requirement and is only for project costs. The funding will not cover day-to-day operating expenses or staff salaries.

In June of 2024, AgKnow reached out to Alberta ASB's regarding a gap between grants, with an urgent ask for bridge funding to support and sustain the ongoing delivery of current services. As a result of this funding gap, the free access to the Farm-Informed Counselling Program was forced to pause. Producers can still access the service, however there is now a cost associated to the service. This is concerning as the top barrier to Alberta farmers accessing mental health support was the associated cost of accessing care.

In the brief time AgKnow has been delivering programming, it has made a significant impact on mental health support in Alberta's agricultural landscape. Many Alberta municipalities wished to answer the call to support AgKnow, however, many were unable to support due to budgetary constraints. Waiving of the matching requirements through SCAP until such time that the AgKnow initiative can amass appropriate sponsorship, corporate partnerships, and self-generating funds to offset funding granted through SCAP, would ensure that Alberta's farmers and ranchers are ensured access to free, agriculturally-informed mental health supports.

RESOLUTION 10-25: Farm Family Awards

**WHEREAS** since its launch in 1969, farm families from northern and central Alberta communities have been recognized as recipients of the Farm Family Award;

**WHEREAS** the farm family award honours both farming business practices and community involvement;

**WHEREAS** Agricultural Service Boards have traditionally been responsible for selecting families who best represent values of the family farm in their rural community;

**WHEREAS** in 2024 Explore Edmonton decided to suspend the Farm Family Awards Program indefinitely; and

**WHEREAS** the Calgary Stampede Agricultural Society continues to honour farm families in southern Alberta.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

Alberta Agriculture and Irrigation and/or the Alberta Association of Agricultural Societies work to ensure an annual Farm Family Awards Program is available for all communities in Alberta with an established Agricultural Service Board.

**SPONSORED BY:** Parkland County

**MOVED BY:** \_\_\_\_\_

**SECONDED BY:** \_\_\_\_\_

**CARRIED:** \_\_\_\_\_

**DEFEATED:** \_\_\_\_\_

**STATUS:** Provincial \_\_\_\_\_

**DEPARTMENT:** Alberta Agriculture and Irrigation  
Alberta Association of Agricultural Societies

**BACKGROUND INFORMATION**

- Since its launch in 1969, farm families from northern and central Alberta communities have been recognized as recipients of the Farm Family Award.
- In the past, Northlands Agricultural Society has administered and presented the Farm Family Award to producers in Northern and Central Alberta.

- In 2021 Northlands Agricultural Society ceased to exist and various aspects of their operations, including the Farm Family Awards Program were taken over by Explore Edmonton. However, Explore Edmonton is not an Agricultural Society.
- In 2024 Explore Edmonton decided to suspend the Farm Family Awards Program indefinitely.
- Every year, the Calgary Stampede and BMO Bank of Montreal recognize outstanding farm families in southern Alberta. The awards program was created to promote a renewed urban-rural relationship and to recognize outstanding southern Alberta farm families who best typify the value of the family farmer to our society. The program focuses on recognizing the contribution to the enhancement of quality of life as a family unit. Each year, the municipal districts in southern Alberta nominate one family. The families are invited to the Stampede for the presentation of the BMO Farm Family Awards.
- Parkland County has a long agricultural history, and it is still a strong driver of our industry and community. Every year in which an award has been distributed since its inception in 1969, except for one, a farm family in Parkland County has been nominated for a Farm Family Award. This has resulted in forty-three Parkland County families being presented the prestigious award.
- In Spring of 2024, Parkland County's Council and Agricultural Service Board both provided letter to Explore Edmonton urging their organization to continue administering the awards program to recognize the hard work of farm families in northern and central Alberta and to elevate the agricultural industry in Alberta. This advocacy effort was unsuccessful.

## RESOLUTION 11-25: Agriculture Education Funding

- WHEREAS** agricultural production in Alberta has historically been, and remains, a significant economic driver and source of employment;
- WHEREAS** generations ago, many Albertans were raised on family farms, gaining firsthand knowledge of livestock, crops, and other agricultural practices;
- WHEREAS** today, most Albertans reside in urban areas and lack the same level of understanding about how livestock, crops, and agricultural products are cultivated;
- WHEREAS** the public has traditionally held agriculture and farmers in high esteem for their role in providing food for Albertans, Canadians, and people worldwide, leading to an increasing consumer interest in agricultural production and food sourcing;
- WHEREAS** misunderstandings regarding agricultural practices and food production are becoming more common, and without proper education, these misconceptions are likely to grow within the expanding population;
- WHEREAS** educating our children and youth about agriculture is crucial for fostering a deeper understanding of food production, sustainability, and the vital role agriculture plays in our economy and environment; and
- WHEREAS** stable funding would empower educators and childcare providers to access essential agricultural education materials and programs, allowing ASBs across Alberta to effectively enhance agricultural knowledge among the younger generation.

**THEREFORE BE IT RESOLVED****THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Ministry of Education work collaboratively with the Agricultural Services Boards, Rural Municipalities of Alberta, and Ministry of Agriculture and Irrigation to establish a dedicated funding stream aimed for agriculture education.

Ministry of Agriculture and Irrigation  
Rural Municipalities of Alberta

## BACKGROUND INFORMATION

Lac La Biche County, like most Alberta rural municipalities, has a significant world – class agricultural sector that is a Canadian success story sometimes unknown to the community at large.

In 2019 Lac La Biche County presented the Resolution Mandatory Agriculture Education in the Classroom, to which the government responded with an emphasis on the Classroom Agriculture Program (CAP) which began delivering agriculture education to Alberta students in 1985. The program is presented to grade four and five students across Alberta at no charge. Volunteers deliver the program through storytelling, engaging props and fun activities. CAP is now part of Agriculture For Life, a long-time funding partner of the program.

We wholeheartedly support the valuable efforts of the CAP / AgForLife initiative and recognize the positive impact they have made. However, we believe that smaller and Northern communities could greatly benefit from supports to ensure a more balanced outreach. While the organization administers the CAP through dedicated volunteers, it's important to note that their team does not have a physical presence in this region of Alberta. Enhancing in-person engagement would further enrich the educational experience and foster greater connection with agriculture among our local youth. The educational funding stream would be utilized to create local opportunities and partnerships for expanding agricultural education at a grassroots level, rather than one-size fits all provincial solutions.

Lac La Biche County started a program called the Agriculture and Safety Education Program to allow for local schools, individual educators, childcare centres and day homes to apply for funding to gain knowledge and experience about agriculture whether it be for field trips, in-classroom experiments, presentations or materials. The County's Agricultural Service Board wants to see this type of program and initiative expanded, and additional funding provided by the province to be utilized for similar programs to increase the awareness and knowledge of farm safety, agriculture production and sustainable practices among children and youth, ultimately fostering a stronger connection to the agricultural community and encouraging future generations to engage in and support the industry through locally created and sourced initiatives.

RESOLUTION 12-25: Charitable Gaming Policies Handbook

**WHEREAS** rural municipalities have been encouraging non-profit organizations to increase activities that generates revenue and build reserve funds for future projects and capital replacements to use as matching funds when applying for provincial and federal grants;

**WHEREAS** the 2020 Charitable Gaming Policies Handbook (CGPH) section 4.4 indicated clear use of proceeds was consistent to the supportive intent of gaming funds as earned revenue;

**WHEREAS** the updated 2022 CGPH section 4.4 now states charitable programs expenses for that generate or receive revenue must be managed on a cost recovery;

**WHEREAS** the updated 2022 CGPH section 4.4 also states the purchase of any equipment, supplies, or services used in any activity or operation intended to generate profit is forbidden; and

**WHEREAS** the updated 2022 CGPH section 4.4. states that only when program revenues are not sufficient to cover program expenses, gaming proceeds may be used to pay the shortfall for approved expenses and therefore forcing the depletion of the organizational reserves.

**THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Service Alberta and Red Tape Reduction and the Alberta Gaming, Liquor and Cannabis Commission to amend the Charitable Gaming Policies Handbook so rural non profit organizations are allowed to build reserves and generate revenues once again without affecting the ability to use the gaming proceeds.

**FURTHER THEREFORE BE IT RESOLVED**

**THAT ALBERTA’S AGRICULTURAL SERVICE BOARDS REQUEST**

That the Service Alberta and Red Tape Reduction and the Alberta Gaming, Liquor and Cannabis Commission suspend any audits until stakeholder engagements are completed and the amendments to the Charitable Gaming Policies Handbook are adopted.

The updated CGPH 2022 [https://aglc.ca/sites/aglc.ca/files/2023-10/22-05-02%20CGP%20Handbook\\_0.pdf](https://aglc.ca/sites/aglc.ca/files/2023-10/22-05-02%20CGP%20Handbook_0.pdf)

**POLICY 4.4 USE OF GAME PROCEEDS**

4.4.1 Gaming proceeds must only be spent on charitable purposes approved by AGLC.

4.4.2 Gaming proceeds are funds remaining from total gaming event revenue after the payment of approved prizes and event expenses, and the commission for groups at whose licensed gaming events AGLC conducts provincial lotteries.

4.4.3 Gaming proceeds include all donations received from gaming funds and interest, dividends, or other income earned from gaming proceeds.

4.4.4 Gaming proceeds must only be used for AGLC approved objects which are consistent with the group's eligibility for a gaming licence and essential to the delivery of the group's charitable objectives, programs, and services. Gaming proceeds must be spent reasonably and in a cost-effective manner to support the group's charitable purpose.

4.4.5 Groups may use gaming proceeds to pay reasonable bank fees required for the operation of the group's gaming bank account(s). Gaming funds must not be used for avoidable fees such as late fees, non-sufficient funds (NSF), overdraft, etc.

4.4.6 Groups requesting changes to currently approved use of proceeds must submit the Request to Amend Use of Gaming Proceeds (Form 5506) to AGLC and must have AGLC approval prior to the use of

proceeds for those purposes.

4.4.7 Payments for approved charitable purposes must be:

- a) made directly from the gaming account to the vendor or supplier by credit card, debit card, pre-authorized debit (PAD), electronic funds transfer (EFT), bank draft, or cheque;
- b) fully supported by receipts, invoices, and/or other documents such as contracts, agreements, time sheets, etc.; and
- c) authorized by two current members of the group's volunteer elected executive:
  - i. invoices or other supporting documents for credit card, debit card, PAD, EFT, and bank draft payments must be signed by two members of the group's executive; and
  - ii. cheques must be signed by two authorized signing authorities of the group's executive.

4.4.8 Transfers from the gaming account to a non-gaming account must only be made for reimbursement of AGLC- approved wages paid from a non-gaming account.

4.4.9 Gaming proceeds must be deposited with a recognized financial institution in Alberta and must remain in the respective gaming account(s) until spent on the group's approved uses. If not immediately required, gaming proceeds may be:

- a) deposited into separate Canadian Deposit Insurance Corporation (CDIC) insured account(s); or
- b) used to purchase Guaranteed Investment Certificates. Note: the financial institution, account or deposit number, and value of funds in the account(s) must be identified on all financial reports.
- c) All interest, dividends, or other income earned by these funds are deemed gaming proceeds.

4.4.10 A group must not use proceeds for debt incurred except as permitted in Section 5.15 – Facility.

- a) Proceeds must be used for current expenses only. Non-gaming funds must be used when gaming funds have been exhausted.
- b) If non-gaming funds are deposited to the gaming account, these funds may not be removed from the gaming account once financial reporting for AGLC is complete.
- c) Proceeds from one licence must not be used to cover gaming losses from another licence.

4.4.11 Gaming proceeds must not be used for:

- a) fundraising activities;
- b) the purchase of any equipment, supplies, or services used in any activity or operation intended to generate profit;
- c) members' self-interest or individual/personal benefit;
- d) the social, recreational, hobby, commercial, or professional interested of its members or others; and
- e) expenses not specifically accommodated in the use of

proceeds policies. Cost-Recovery

- f) Expenses for charitable programs that generate or receive revenue (e.g., admission fees, registration fees, donations, grants, advertising revenue, facility rental revenue, etc.) must be managed on a cost recovery basis. Program revenue must be used to pay for program expenses first.
- g) Any revenue, donations, and/or grants received for programs or activities must be spent prior to any gaming proceeds being used.
- h) If program revenues are not sufficient to cover program expenses, gaming proceeds may be used to pay the shortfall for approved expenses.

The 2020 CGPH [https://aglc.ca/sites/aglc.ca/files/2020-12/19-09-10\\_CGP\\_Handbook.pdf](https://aglc.ca/sites/aglc.ca/files/2020-12/19-09-10_CGP_Handbook.pdf)

#### Section 4.4

##### **POLICY:**

Gaming proceeds shall only be spent on charitable and religious purposes approved by AGLC.

##### **STANDARDS:**

1. Gaming proceeds are funds remaining from total gaming event revenue after the payment of approved prizes and approved gaming event expenses, and the commission for charities at whose licensed gaming events the AGLC conducts provincial lotteries. Gaming proceeds shall also include all interest, dividends or other income earned on gaming proceeds deposited in interest accounts or held, with AGLC approval, in deposit certificates or investments made by a trustee.
2. A charitable or religious purpose is a program or service which provides a charitable community benefit to a significant segment of the community as defined in Section 2.1 - Basic Eligibility.
3. Gaming proceeds must only be used for AGLC approved objects which are consistent with the group's eligibility for a gaming licence and essential to the delivery of the group's charitable or religious programs. (Amended Jul. 2016)
4. Gaming proceeds shall be used to support the group's overall objectives, programs and services as approved; and not solely to provide benefits to specific or select members of the group.
5. Changes to the approved use of proceeds after the gaming licence is issued must be approved by AGLC prior to the disbursement of proceeds. Two executive members of the licensed group must sign the letter of request for the change in the use of proceeds.
6. Payments for approved charitable and religious purposes must be: (Added Sept 2019)
  - a) made directly from the gaming account to the vendor or supplier by credit card, debit card, pre-authorized debit (PAD), electronic funds transfer (EFT), bank draft or cheque;
  - b) be fully supported by receipts, invoices and/or other documents such as contracts, agreements, time sheets, etc.; and
  - c) authorized by two current members of the group's executive:
    - i. invoices or other supporting documents for credit card, debit card, PAD, EFT and bank draft payments must be signed by two members of the group's executive; and
    - ii. cheques must be signed by two authorized signing authorities of the group's executive. Note: With prior notification to AGLC wages paid from a non-gaming account may be reimbursed with gaming funds.
7. Gaming proceeds shall normally remain in the respective gaming account until spent on the approved uses. If not required immediately, gaming proceeds may:
  - a) be put into a separate interest account(s);
  - b) be used to purchase deposit certificate(s); or
  - c) if the group qualifies as a Trustee under the Trustee Act, be invested subject to the conditions established for and applying to, investments by a trustee under the Trustee Act. To qualify to invest, AGLC will require a letter from the group's lawyer confirming the trustee qualification.
  - d) If gaming proceeds are re-directed as stated in Standard 7a) to c), the following conditions apply:
    - i) investments made as stated in Standard 7a) and b) shall be fully insured as defined in the Canada Deposit Insurance Act;

- ii) the financial institution, account or deposit number, or details of other permitted investments and the total value of the proceeds transferred or invested shall be identified on financial reports
  - iii) all interest, dividends or other income earned becomes part of gaming proceeds and shall be retained in the separate interest-bearing account or shall be retained as part of the investment if the income is in the form of shares or units; and
  - iv) when needed for approved uses, proceeds shall be transferred back to the gaming account to be disbursed.
  - e) be contributed to an endowment fund as specified in Section 5.25.
8. Disbursements of gaming proceeds must be made within 24 months of receipt of the funds, unless the proceeds are contributed to an endowment fund.
9. A group may request prior written approval from AGLC to extend its disbursement of proceeds for a period longer than 24 months. Extensions may be approved to a maximum of \$75,000 in proceeds and/or, to a maximum of an additional 24 months during which time the retained proceeds must be disbursed as per a group's approved use of proceeds. (Added Mar 2018)
- Note: Standard 9 does not apply to: (Added Mar 2018)
- fundraising groups, licensed under Section 3.10, which may request approval to retain an amount higher than \$75,000 but may not retain proceeds longer than an additional 24 months; and groups approved by AGLC to retain proceeds for a facility (see Section 5.11).
10. All requests for an extension must be submitted using AGLC's "Request for Extension to Disburse Proceeds" form. The request form includes, but is not limited to: (Amended Mar 2018)
- a) amount of proceeds for which an extension is being requested;
  - b) source of proceeds (e.g. casino, raffle) and the dates the proceeds were received;
  - c) a written explanation why the proceeds have to be accumulated beyond 24 months;
  - d) any other sources of revenues associated with the planned project or event;
  - e) a list of expenditures associated with the planned project or event; and
  - f) timelines for the anticipated disbursement of the accumulated proceeds.
11. If a group fails to comply with Standards 8 or 9 above, or fails to meet the terms granted in an extension, the group may be subject to Board-directed sanctions, such as: (Amended Mar 2018)
- a) a temporary suspension of gaming licences, resulting in a delay in conducting further charitable gaming events until the group has demonstrated that policies have been met;
  - b) permanent revocation of gaming licences; and/or directives to donate a portion or all gaming proceeds to other eligible charitable organizations as approved by AGLC.
12. A use of proceeds not specifically accommodated in the use of proceeds policies is considered an ineligible use of proceeds.

## RESOLUTION 13-25: Resolution Lobbying Inclusion

**WHEREAS** the sponsoring municipality has a deep understanding and stake in lobbying the position of the resolution;

**WHEREAS** this knowledge is critical regarding the delivered intent; and

**WHEREAS** the current approach potentially falls short in accurately conveying that intent and direction of the requested change.

**THEREFORE BE IT RESOLVED****THAT ALBERTA'S AGRICULTURAL SERVICE BOARDS REQUEST**

That when specific resolutions secure lobbying opportunities for the Agricultural Service Board Provincial Committee, they in turn invite or consult with the sponsoring municipality to verify the resolution is communicated accurately and effectively.

**SPONSORED BY:** County of Northern Lights

**MOVED BY:** \_\_\_\_\_

**SECONDED BY:** \_\_\_\_\_

**CARRIED:** \_\_\_\_\_

**DEFEATED:** \_\_\_\_\_

**STATUS:** Provincial

**DEPARTMENT:** Agricultural Service Board Provincial Committee

**BACKGROUND INFORMATION**

The resolutions we draft take substantial time and commitment to develop. We feel that after a resolution passes the Provincial Conference, we should be extended the opportunity to be in the room when and if the time arises to discuss our resolutions with the various departments. We feel too often the intent of the resolution gets lost as the sponsoring municipality is not included in the lobbying process. Also, as the writers of the resolutions our input into the grading process should be weighted heavier as to whether we agree with the grade or not. It shouldn't necessarily be a simple majority for grade determination.

## Agricultural Service Board

---

|             |   |
|-------------|---|
| Subject:    | Calgary Stampede BMO Farm Family Report                       |
| Date:       | January 16, 2025  |
| Presenter:  | Kristyn Lines, Manager, Agricultural & Environmental Services |
| Department: | Agricultural & Environmental Services                         |

### REPORT SUMMARY

---

Each year since 1996, the Calgary Stampede has recognized outstanding agricultural families who exemplify the value of the “family farm” to rural communities and to society in general. Agricultural Service Boards from across southern Alberta are asked to nominate a deserving family for recognition at the Stampede.

### ADMINISTRATION’S RECOMMENDATION

---

Administration recommends that the Agricultural Service Board selects the Rocky View County Master Farm Family Award winner from 2024 be the 2025 Calgary Stampede BMO Farm Family Award nominee.

### BACKGROUND

---

The Calgary Stampede has a long tradition of bringing people together to celebrate the successes and the unique spirit of the community. They strive to engage Albertans in the celebration of western heritage and values, as well as to showcase Alberta to the world.

### DISCUSSION

---

It has been the Agricultural Services Board’s practice to nominate one of Rocky View County’s previous Master Farm Family Award winners in the chronological order that they were recognized by Rocky View County.

### ALTERNATE DIRECTION

---

Administration has no alternate direction for the Board’s consideration.

### ATTACHMENTS

---

- Attachment A: Calgary Stampede Farm Family 2025 Nomination Form
- Attachment B: Farm Families Throughout the Years

## 2025 BMO Bank of Montreal FARM FAMILY AWARDS

### PURPOSE:

Promote a relationship between urban and rural people,

Focus on agriculture at the Calgary Stampede, and

Increase awareness of the high ideals of the way of life in agriculture and the many opportunities of rural citizenship.

### OBJECTIVES:

Recognize, on an annual basis, outstanding Southern Alberta farm families (in or south of Township 34) who best typify the value of the family farmer to our rural communities and society in general, and

Honour these families at the 2025 Calgary Stampede.

**SELECTION COMMITTEE AT THE LOCAL LEVEL:** Agricultural Service Board

### GUIDELINES FOR SELECTION:

Please select a family deserving of recognition for both agricultural and community involvement. The farm family must be active in primary agriculture, have agriculture as the main source of income and have members residing on the farm (agribusiness not eligible).

The method of selection is up to the individual Agricultural Service Board. It is important that the family selected be the representative of the municipality from which they are chosen. *It is also important to keep in mind that this program focuses on recognizing the contribution to the enhancement of quality of life as a family unit, not necessarily the business of farming.*

*In the case of a nomination where more than one farmer or farm couple within a family unit is being named, a primary contact must be identified for communication purposes.*

**NOTE:** A form for the collection of additional information will be forwarded to the family upon receipt of this nomination. Completion and submission of this form will be their responsibility. You will not be required to provide any further information after that time.

## Rocky View County Master Farm Family Award Winners

- 1989 – Wineglass Ranch, Cochrane
- 1990 – Lance & Heather Wheeler, Dalemead
- 1991 – Joe & Nancy Jeffray, West Airdrie
- 1992 – Daryl & Evelyn Winkler, Langdon
- 1993 – Roy & Diana Woolliams, West Airdrie
- 1994 – Gordon & Christine Bishop, Langdon
- 1995 – Ken & Caren Sackett, Crossfield
- 1996 – Greg & Cheryl Rockafellow, Crossfield
- 1997 – Raymond & Liz Havens, Madden
- 1998 – Harold & Marion Randall, Kathyrn
- 1999 – Scott & Carol McKay, East Airdrie
- 2000 – Neil & Bev Miller, Dalemead
- 2001 – Hanson Ranches, Ron & Renie, Wayne & Rhonda, Airdrie
- 2002 – Lamb Cattle Co., John & Kim Lamb, Balzac
- 2003 – Cairns Feed Yard, Larry & Joan, D.J. & Pam, Madden
- 2004 – No Nominees (BSE crisis year)
- 2005 – Don & Marlene Farquharson, Madden
- 2006 – Scott Stock Farm, Earl & Jon Scott, Crossfield
- 2007 – Jim Dunn Family, Cochrane
- 2008 – Walsh Family Farms, Madden
- 2009 – Dennis & David Rowney Families, Madden
- 2010 – Lloyd & Gary Malyk Families, Airdrie
- 2011 – Morison Family Farms, Rod & Cheryl Morison, Airdrie
- 2012 – Rocky View Farms, Eric Longeway, Springbank
- 2013 – Jones Hereford Ranch, Allen & Shannon Jones, Balzac
- 2014 – Darcey & Leisa Gallelli, Crossfield
- 2015 – Taks Farm, Murray & Reba Taks, Crossfield
- 2016 – Lazy M Ranches, Doug & Patti-Ann Milner, Crossfield
- 2017 – Marshall and Teresa Copithorne, of CL Ranches Ltd  
(declined Stampede Farm Family due to working w/ Stampede – noted conflict of interest)
- 2018 – Don & Betty Schissel, of DA Schissel & Son, Beiseker
- 2019 – Ron and Donna Hurt, of Cross Rock Ranch Ltd, Crossfield
- 2020 – no recipient due to COVID-19
- 2021 – no recipient due to COVID-19
- 2022 – Cleveland Ventures Ltd Keith & Rhonda Cleveland
- 2023 – Long Acre Ranch Tracy Hanson & Earl Munro
- 2024 – Woolliams Farms Ltd. (Larry, Kourtney, Paige & Trace)
- 2025 –

## Agricultural Service Board

|             |  |
|-------------|--|
| Subject:    | Upcoming Events Report                     |
| Date:       | January 16, 2025                           |
| Presenter:  | Laura Poile, Agricultural Services Officer |
| Department: | Agricultural & Environmental Services      |

### REPORT SUMMARY

This report is an itemized list of upcoming events that relate to production, marketing, sustainability, and community.

### ADMINISTRATION'S RECOMMENDATION

Administration recommends that the Upcoming Events Report be received for information.

### BACKGROUND

One of the recommendations within the Agriculture Master Plan is to foster capacity building for the agriculture community in areas of enhanced educational services and programs. The intent is to provide support and information resources to producers for specialized opportunities and diversification within the ag industry. ASB meetings provide the opportunity to learn of local and regional conferences and training sessions of interest.

### DISCUSSION

The events below are identified for the Board's information.

1. Connecting Women in Agriculture virtual series: Proactive Transition Planning: Empowering family, business, and legacy [January 21](#)
2. Sustaining Barley webinar series  
Winter Cereals Potential: Bolstering sustainability with winter grains [March 12](#)  
Alternative N: Sources to drive emission reductions [April 2](#)
3. Alberta Beef Producers Producer meetings [January 29](#) in Olds.
4. Beef Cattle Research Council Winter webinar series  
Foot and Mouth Disease: The Inside Scoop for Veterinary Professionals - [February 12](#)  
Parasite Management: The Ins and Outs of External and Internal Parasite Management - [March 19](#)
5. Ladies Livestock Lessons, Acme [January 17](#)
6. FCC Young Farmer Summit, Strathmore [January 22](#)
7. Alberta Canola Conference, AGM & Research Symposium, Red Deer [January 22-23](#)

## Upcoming Events Report

---

### 8. Nutrient Management Webinar Series

- Water Resilience: Drought Mitigation Strategies for Crops; Water Use Efficiency and Irrigation - [January 27](#)
- Soil Health: Soil Amendments; Soil Health Indicators - [February 3](#)
- Pasture Management: Bale Grazing; Regenerative Management - [February 10](#)

### 9. Control Strategies – Gopher, Ungulate & Predators, High River [January 30](#)

### 10. Agricultural & Environmental Services workshop list.

## **ALTERNATE DIRECTION**

---

Administration has no alternate direction for the Board's consideration.

## **ATTACHMENTS**

---

Attachment A: Agricultural & Environmental Services workshop list

## Agricultural & Environmental Services Workshops - 2025

1. **Ladies Livestock Lessons** (Red Bow Agriculture Partnership)  
Friday, January 17<sup>th</sup>  
8:30am to 4:00pm  
Acme Hall, Acme, AB
2. **Ranching Opportunities** (Red Bow Agriculture Partnership)  
Thursday, February 5<sup>th</sup>  
8:30 am to 4:00 pm  
Pomeroy Inn & Suites, Olds, AB
3. **Living in the Natural Environment** (MD of BigHorn)  
Friday, February 7<sup>th</sup>  
4:00pm to 9:00pm  
Cochrane RancheHouse, Cochrane, AB
4. **Environmental Farm Plan**
5. **Agri-Environmental Programming**
6. **Working Wells**  
Tuesday, February 4<sup>th</sup>  
6:00pm to 9:00pm  
County Hall, Rocky View County
7. **Vegetable Gardening for New to Intermediate Growers**  
Thursday, March 6<sup>th</sup>  
6:30pm to 8:30pm  
County Hall, Rocky View County
8. **Emergency Management for Farms & Ranches**
9. **Orientation to Beekeeping**  
Wednesday, March 12<sup>th</sup>  
6:30pm to 8:30pm  
County Hall, Rocky View County
10. **All About Trees**
11. **Farmer Pesticide**
12. **Septic Sense: Solutions for Rural Living**
13. **Human Wildlife Co-Existence/BearSmart**

14. The Alien Invasion: Protecting Alberta's native plants from the ever-pressing threat of invasive species/Native Plants

15. Green Acreages

16. Horse Health & Maintenance

17. Vegetable & Fruit Harvest

Other workshops we are planning stay tuned!

Aggie Days – April 10<sup>th</sup> to 14<sup>th</sup> Nutrien Western Event Centre, Stampede Park

AgVenture Tour – July 24<sup>th</sup> (tentative, SW County)

For more details, registration and more upcoming events visit [www.rockyview.ca/AgEvents](http://www.rockyview.ca/AgEvents)
