These pictures were taken May 26, 2021 one minute apart and 50 meters apart. Both are of the north facing slope toward RR232. You will notice the oats encroaching on our yard. Other than that, this is what their yard looked like 8 years ago. Their paddock drains into the ditch on the south side of RR232, flows west about 50 meters, then goes through a culvert to the north side of the road and then towards the creek....Bragg Creek.
