- 3.5.4.2 Collaborative processes for regional recreation decision-making will build trust, be transparent, and respect an individual municipality's right to make its own recreation decisions.
- 3.5.4.3 To further voluntary regional collaboration, the CMRB will establish a recreation working group of member municipalities to facilitate collaboration by identifying areas of common interest, coordination, regional challenges and to share information.

- 3.5.4.4 When working together, member municipalities will establish processes that incorporate evidence-based decision making to the greatest extent possible.

COVID-19

Increased Flexible Working

Flexible working adopted during the pandemic looks likely to persist into the future

Sector Challenges

Some sectors battered, some prospered. Some will bounce back, some won't

Digital Access to Services

Massive acceleration in digital services offers secure, richer engagement for more customers over more dispersed areas

Public Sector Debt

Enormous hit to public debt and huge recovery bills outstanding, before we get back to backlog and pipeline going forward

Everyday Economy

Key workers' role in the nation's response to the pandemic could lead to a wider re-evaluation of worth for the everyday economy

Bio Security & Hygiene

Stronger interest in safety among consumers and workplace practices, even after the virus is under control

Globalization

More Places of Choice

Talented people have more choice than ever about where to live and work

Protectionism & Localism

Global trends in trade liberalization have slowed and re-shoring is occurring, but supply chains reach further

Growing Inequality

The global competition for talent and resources risks creating new patterns of poverty & wealth side by side

Developing World Growth

Low-cost nations are evolving into knowledge-based competitors to developed countries like Canada

Growing Resource Demand

Demand for minerals and energy is set to continue on an upward trend as the global economy grows

Trade & Innovation

Businesses that trade bring investment, ideas and talent to strengthen the local economy

Digitization

Accelerating Online Spend

Massive shift away from physical stores to digital shopping

Reducing Business Costs

Digital technology will continue to drive huge costs savings for businesses

Re-Shaping Work

Better paid jobs increasingly require basic and advanced tech know how

Deeper Automation

Latest wave of technology innovation is replacing jobs in mid-tier knowledge roles as well as manual jobs

Extending Business Reach

Digital services can be delivered anywhere in the world from anywhere in the world

Driving Investment

Inward investors increasingly look for fast, affordable and reliable fixed and wireless connectivity at work and home

Net Zero

Global Carbon Targets

Canada is committed to net zero by 2050 and likely to put incentives in place to encourage change in industry

Demand & Returns Peaking

Oil and natural gas demand to fall long-term with accompanied fall in prices which will not favor investment

Economic Diversification

The Alberta economy relies heavily on carbon, but has capacity to evolve into growth markets

Massive Investment

The shift to net zero in energy supply, homes and transport is a major opportunity to create new growth

Innovation Spur

The shift to net zero will create many opportunities for innovative businesses to develop new products and create new jobs

Ethical Actors

Consumers are increasingly putting priority on locally sourced, low impact produce and on economic values

How Will Calgary Metropolitan Region Respond?

- + What are the biggest threats?
- + What are the biggest opportunities?
- + What assets do we have in our favour?
- + What is our competition up to?
- + How well prepared are we to address unknowns?

Could economic strategy help us answer these questions?

Already In Place In Different Ways

Purpose of Strategy

- + Set A Long Term Course
- + Make Choices & Setting Priorities
- + Establish a Shared Vision
- + Agree the Character of Growth We Aspire For

we welcome everyone to join us in living happy, healthy and
prosperous lives in a spectacular natural environment.

We are a world leading region built on hard work, resilience,
helping others and a deep respect for nature.

We use our land wisely, share our services and care for our
